The Expert Negotiator, 4th Edition Raymond Saner, 2012-05-31 Success in negotiation is not a matter of chance but the result of careful planning and specialized skills Some of these skills are inborn others need to be learnt In this book the social scientist and economist Professor Dr Raymond Saner draws on his long years of experience as a negotiation adviser teacher trainer researcher and university lecturer to show that two thirds of negotiation practice is learnable Yet very few people are specifically trained in this everyday task Without sacrificing scientific accuracy Professor Saner offers a highly readable and fascinating guide to the subject In so doing he does not limit himself to the over simplified tips generally put out on successful bargaining in every imaginable situation Rather he treats the different aspects of negotiation practice in a way that is useful to both academics and practitioners such that the general laws and principles gradually become evident as and of themselves The aim of this approach is to reveal the essence of negotiation through the experience of both the author and the reader Such an understanding of the processes involved in negotiation is of far greater practical value than a mere collection of recipes with no discussion of the underlying theory while the most comprehensive treatment of the theory without reference to its application in practice would be only half the story Thus the text is supplemented by a series of illustrative examples and case studies from the business political NGO and international organization arenas plus some seventy figures and tables With all this the author has paid considerable attention to writing a text that is both entertaining to read and rigorous in content

Osigweh, 2013-11-11

Organizing consists of making other people work We do this by manipulating symbols words exhortations memos charts signs of status We expect these symbols to have the desired effects on the people concerned The success of our organizing activities depends on whether the others do attach to our symbols the meanings we expect them to Whether or not they do so is a function of what I have sometimes called the programs in their minds their learned ways of thinking feeling and reacting in short a function of their culture The assumption that organizations could be culture free is naive and myopic it is based on a misunderstanding of the very act of organizing Certainly few people who have ever worked abroad will make this assumption The dependence of organizations on their people's mental programs does not mean of course that we do not find many similarities across organizations Some characteristics of human mental programming are universal others are shared by most people in a continent a country a region an industry a scientific discipline or even a gender
