**"Accounting exists within an business primarily to facilitate the development and implementation of business strategy..."**

**Three important generalizations emerge from this way of viewing management accounting:**

- **Accounting is not an end in itself, but only a means to help achieve business success**
- **Specific accounting techniques or systems must be considered in terms of the role they are intended to play**
- **In evaluating the overall accounting system... the key question is whether the overall fit with strategy is appropriate."**
