Gerace, 2004-06-01

Wherever international commerce flows in world politics military power often flows with it sometimes as a protector of commerce sometimes as its promoters and sometimes as a tool of aggression against it How are military power and international trade related Do military power and commerce expand together or does military power decline as commerce and perhaps interdependence increases Does this relationship vary across countries and if so how Power Conflict and Trade is a study of the relationship between military power and international commerce among the Great Powers prior to World War I After building an argument for a direct relationship between military power and commerce one grounded in a mercantilist view of state power and exploring their numerous connections the book estimates models of the relationship among the Great Powers and explores a great deal of their commercial and military data all of which is situated in the context of their mutual rivalries Another question investigated is whether the peacetime conflicts and rivalries of the Great Powers affected their trade relations adversely There is strong support for the argument that military power and commerce move together in world politics though there is evidence for an inverse relationship as well

**The Geopolitics Of Southern Africa** Kent H Butts, Paul R Thomas, 2019-07-09 South Africa is the dominant force in an area that is of increasing strategic importance to the West yet few studies address the geopolitical pressures that dictate the course of events there

Analyzing South Africa's base of power the authors argue that because South Africa's relationships with other states in Southern Africa are asymmetrical in nature the country has substantial economic and political leverage in the region. Control of Southern Africa's transport infrastructure and the ability to project a conventional or surrogate military presence throughout the region for example gives South Africa the power to affect the economic and political stability of virtually all regional states. Asymmetry also characterizes relationships at the global level. Because the West depends upon South Africa for access to the region's strategic minerals for the security of the Cape oil route and for the country's ability to counterbalance the Soviet presence in Southern Africa South Africa exercises considerable influence over the African foreign policies of the superpowers. Focusing on the major geopolitical variables affecting South Africa's ability to sustain power the authors analyze the economic and geographic factors that contribute to asymmetrical relationships and examine the pluralism that divides South African society. Pretoria's successful foreign policy which has created a security corridor of new buffer states is given particular emphasis. In addition the authors provide a detailed analysis of South Africa's minerals based economy and discuss the implications for regional stability of economic sanctions against South Africa. Finally they outline a policy framework that takes regional economic political and geographic realities into account.

**Who Controls Public Lands?** Christopher McGrory Klyza, 2000-11-09 In this historical and comparative study Christopher McGrory Klyza explores why land management policies in mining forestry and grazing have followed different paths and explains why public lands policy in general has remained virtually static over time. According to Klyza understanding the different philosophies that gave rise to each policy regime is crucial to reforming public lands policy in the future. Klyza begins by delineating how prevailing policy philosophies over the course of the last century have shaped each of the three land use patterns he discusses. In mining the model was economic liberalism which mandated privatization of public lands in forestry it was technocratic utilitarianism which called for government ownership and management of land and in grazing it was interest group liberalism in which private interests determined government policy. Each of these philosophies held sway in the years during which policy for that particular resource was formed says Klyza and continues to animate it even today.

**The Politics of the Caribbean Basin Sugar Trade** Scott Macdonald, Georges A. Fauriol, 1991-06-30 Growing global interdependence made the 1970s and 1980s a volatile period in the sugar trade at a time when Caribbean countries while not the major world producers of sugar were economically dependent on their sugar exports Since then government farm supports and quotas on imported sugar in the United States overproduction in developing countries and the emergence of a highly protected European Community sugar industry have all served to make the sugar trade a highly political global issue This study focuses on the evolution of the U S Caribbean Basin sugar trade in the 1980s and its impact on political relations between the countries involved According to the authors the sugar trade was not driven by laws of supply and demand but by various political agendas Economic protectionism government subsidies for inefficient elements of the sugar industry as well as corruption and mismanagement have contributed to the Byzantine politics of the sugar trade Now the United States needs to determine how lifting quotas and terminating subsidies will affect this complex relationship By providing an in depth look at the development of current policies in the sugar trade this book offers the necessary background for making informed policy decisions After examining the U S sugar policy from 1974 to 1989 the book provides a broader Latin American perspective of U S and European Community sugar policies It also offers subregional and country analyses covering the Commonwealth Caribbean Central America Cuba the Dominican Republic Haiti and Panama Despite the difficulty of competing against the United States and Europe Caribbean and Central American countries are likely to continue to depend on sugar cane Climactic and ecological factors make agricultural diversification extremely

difficult Some Caribbean and Central American producers have considered making ethanol automobile fuel from sugar but here too they face protectionist pressure from U S producers of corn Given current political realignments the authors predict that the influence of the United States and the Soviet Union will diminish in the 1990s The European Community on the other hand is likely to have greater influence on the inter American sugar trade Students of Latin American politics and international relationships as well as those involved in the sugar industry or the policies affecting it will find this book a valuable resource for future decisions
