Strategic Planning In Local Government A Casebook:

Strategic Planning in Local Government Roger Kemp, 2024-11-01 This book shows how and why strategic planning is working in cities around the country. It illustrates how this technique enables a city to plan its future proactively and shows how local governments use it to solve current problems and make sure they continue to reach their goals. Using seventeen case studies from a diverse mix of cities, it outlines the components of successful strategic planning, including program design, needs and capabilities assessment, implementation, and ongoing evaluation. In this book, you will see how planners use strategic planning to synthesize population trends, economic conditions, business trends, strategies, and objectives. The authors emphasize that the planning process is not entirely theoretical; real-world factors like support from politicians are crucial. This casebook includes discussion questions with each case. Also included is a chapter devoted solely to a strategic planning model. These features make the book valuable not only to planners on the job but also to students in planning and public administration.

Managing America's Cities Roger L. Kemp, 2014-01-10 This work describes the operations of a typical municipal government and examines the many productivity trends that are occurring in city halls across America. Much of the focus is on the increasing need for planning in city government to ensure that productivity goals are met. It thoroughly examines the roles of the council manager and clerk in promoting increased productivity. It then looks at such municipal departments as legal, finance, fire, human services, library, police, and public works, demonstrating proven techniques and structures in each that improve service. Water and Wastewater Management in the Tropics Jens Lonholdt, 2005-05-31 Water and Wastewater Management in the Tropics provides the necessary conceptual framework and tools to assess all appropriate aspects of water and sanitation projects in developing countries. Using the lessons learned from courses taught at the Technical University of Denmark, Water and Wastewater Management in the Tropics is the concerted effort of a broad team including hard-core engineers and practitioners as well as soft-core environmental and institutional planners and economists, with contributions from renowned researchers as well as seasoned project managers. The first part of the book aims to give a basic understanding of international projects and addresses how to identify, formulate, select, organize, cost, finance, implement, and manage water and wastewater management projects in developing countries. Later chapters focus on three different types of water and wastewater management projects in a tropical context: rural water and sanitation, urban water and wastewater management, and industrial water and wastewater management. Water and Wastewater Management in the Tropics will

appeal to graduate environmental engineering students but also to practitioners economists sociologists and institutional planners working with water and sanitation projects in developing countries **Casebook of Indigenous Business**

Citizens generally have a desire to learn more about America's cities including their own community's municipal government. This is true because people spend most of their lives living, working, and paying municipal taxes in cities. Many citizens, however, know more about their state and federal government than they do about the city in which they live. This is primarily due to the extensive media coverage given to topical issues and news events plus what they as students were never taught in high school civics classes many years ago. City government is the level of government of which citizens should be most informed. After all, the decisions made by the local elected public officials, mayors, and city council members have a more direct and greater impact on their lives than do those decisions made by elected leaders in higher levels of government. This thirst for knowledge is made apparent when speaking before community groups and professional organizations about how much municipal government works. Most citizens want to know more about the operations of their local government including the roles of their elected officials, advisory bodies, chief administrative officer, and the various functional managers that make government work.
