## **Strategic Power Soviet Foreign Policy:**

Strategic Power and National Security J. I. Coffey, 2010-11-23 In this closely reasoned and lucid analysis an important thinker on American strategy surveys weapons technology and its military and political implications for the 1970s J I Coffey refutes the argument that American national security requires superior strategic offensive forces or extensive air and missile defenses In so doing he assesses in simple terms the various factors involved in this complex and difficult subject While many books on strategy deal only with a single area or a particular weapons system this work synthesizes technical and non technical considerations across the whole range of national security issues affected by strategic power war fighting deterrence Communist behavior alliance relationships nuclear proliferation and arms control Its orderly and authoritative marshaling of tabulated data its citations from Department of Defense documents and congressional hearings and its classifications of the alternative options which strategy makers can now pursue are all invaluable to both the student of national security and the professional strategist

Strategic Power Carl G. Jacobsen, 1990-02-23 This book highlights the impact and relevance of strategic culture Each section contains essays contrasting United States and Soviet perceptions on specific topics Each section closes with a synthesizing commentary to help readers to get a better sense of differences and similarities

**Great Power Security Cooperation** David W. Kearn, 2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and

historical approaches *Great Power Rivalries* William R. Thompson, 1999 This volume examines interstate rivalries of the past 500 years providing case studies of those between land powers with continental orientations and leading maritime powers and challengers The contributors focus on the transition from commercial to strategic rivalry **Proceedings of the National Security Affairs Conference**, 1976 The Marine Corps Gazette, 1966 *International Politics* Scott P. Handler, Robert T. Person, 2020-12-10 Why do states do what they do Who are the relevant nonstate actors in international politics and why do they do what they do What causes conflict and cooperation in the international system These are some of the most basic questions that the discipline of International Relations IR seeks to answer they are also the questions that drive the objectives organization and content of this book *International Politics Classic and Contemporary Readings* Second Edition seeks to help students engage critically with some of the world's most challenging questions through the use of leading classic and contemporary scholarship in the field of international relations The first five chapters of the book explore the leading theoretical traditions in international relations while subsequent chapters explore the themes of international security international political economy and contemporary challenges in international relations This organization makes the book easy to use as standalone text or alongside core text Class tested on over 10 000 students in the last decade this text was built from the ground up to introduce students to the traditions and new foundations of international relations as well to the principles of intellectually rigorous thought **Areas of Challenge for Soviet Foreign Policy in the 1980s** Gerrit W. Gong, Angela Stent, Rebecca V. Strobe, 1984 **Long Range US-USSR Competition - National Security Implications**, 1976 We All Lost the Cold War Richard Ned Lebow, Janice Gross Stein, 1995-07-03 Drawing on recently declassified documents and extensive interviews with Soviet and American policy makers among them several important figures speaking for public record for the first time Ned Lebow and Janice Stein cast new light on the effect of nuclear threats in two of the tensest moments of the Cold War the Cuban Missile Crisis of 1962 and the confrontations arising out of the Arab Israeli war of 1973 They conclude that the strategy of deterrence prolonged rather than ended the conflict between the superpowers

**Nuclear Strategy in the Twenty-First Century** Stephen J. Cimbala, 2000-05-30 The future of nuclear weapons and nuclear strategy in the 21st century is not entirely predictable from the Cold War past Nor is it easy to foresee on the basis of what has happened since the Soviet Union collapsed in 1991 Cimbala contends that nuclear weapons and the psychology of nuclear deterrence will remain important after 2000 but the character of that importance will change No longer will nuclear weapons be the dominators of military technology Instead advanced technology conventional weapons based on information and electronics will supplant nuclear weapons as the instruments of military supremacy in the 21st century What Cimbala asks can be expected of nuclear weapons in the 21st century given what we have learned from previous experience in the Cold War and in the 1990s Cimbala expects that nuclear weapons will spread among currently non nuclear states and states with regional grievances or hegemonic aspirations will seek to deploy small nuclear forces as deterrents against neighbors or

against outside intervention by the United States in regional conflicts Regional rogue states may also obtain nuclear weapons Nonetheless as Cimbala explains the international balance of power is unlikely to change As he makes clear power will be less dependent on deployed military platforms and more dependent on information warfare A thoughtful and provocative analysis that will be of particular interest to policy makers scholars and other researchers involved with arms control security studies and international relations **State**, 1985 *Peace, Power, And The United Nations* Joseph P Lorenz, 2019-06-04

The notion that every state has an interest in the territorial integrity of every other state no matter how distant they are and how slight their connections is peculiar to the twentieth century To be sure poets and philosophers had perceived humanity's common interest in preventing wars and statesmen had found that aggression from outside the community could be deterred by the mutual defense of those within it But no one had ever tried to organize an all embracing system that used the collective force of its members to prevent one of them from attacking another It took the wide devastation of two world wars and the failure of the balance of power systems that preceded them to instigate the search for a more effective way to manage power To the founders of the League of Nations and the United Nations there was nothing extravagant about the idea that peace is indivisible Their countries had been drawn into wars that were largely not of their making They had learned that to control their destinies they must act early with others to keep the peace It is this core of national self interest that drives collective security If the system works at any moment in history it is because its members believe they have enough stake in the existing order to warrant taking measures against any nation that threatens to destroy the fabric of that order **National Security, Military Power & the Role of Force in International Relations** United States. Department of the Army, 1976 *Nuclear Deterrence In U.s.-soviet Relations* Keith B. Payne, 2019-03-04 This book critically examines U S attempts to establish a nuclear deterrent against the Soviet Union and offers new approaches to dealing with the changing strategic environment Dr Payne maintains that the most influential theories of nuclear deterrence Assured Vulnerability and Flexible Targeting are unrealistic given Soviet foreign policy and attitudes toward nuclear war and no longer adequately meet the requirements of U S national security Identifying an approach compatible with U S security commitments he argues that future U S policy should focus on defeating the Soviet theory of victory on threatening Soviet military forces and domestic and external political control assets while also defending the U S against nuclear attack The discussion covers recent developments among them the new nuclear strategy of the Carter administration and President Reagan's new weapons program *Congressional Record* United States. Congress, 1989 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873
