Strategic War Against Germany The British Bombing Survey Unit:

The Strategic Air War Against Germany, 1939-1945 British Bombing Survey Unit, 1998 At the close of the Second World War both the RAF and the United States Army Air Forces sent teams of investigators to the continent of Europe to try and assess the effectiveness of Allied strategic bombing The British Survey was originally classified and is published here for the first time By combining the original Report and an analysis of its strengths and weaknesses together with a short history of the genesis of the British Survey this work is an important contribution to the continuing historical debate over the effects of the strategic bombing offensive in the Second World War The Strategic Air Offensive Against Germany Sir Charles Kingsley Webster, Noble Frankland, 1961 *Bombing Germany: The Final Phase* Tony Redding, 2015-02-28 During 1942 and 1943 the striking power of RAF Bomber Command was transformed by the arrival of heavy bombers advanced navigation and blind bombing systems and new tactics to concentrate the bombers over the target and swamp the German defences By October 1944 most of Germany's cities were in ruins yet the bombing continued to intensify reaching unprecedented levels in the final seven months of the air campaign The value of further area raids was questioned during the opening months of 1945 yet the Allies destroyed the remaining cities in a bid to hasten the end of the war The handful of German cities still largely unscathed in early February 1945 included Dresden which was obliterated on 13 February Ten days later the South German city of Pforzheim was destined to suffer the same fate This book commemorates the efforts of the aircrew members who risked their lives consolidating a host of intriguing first hand accounts It also considers Pforzheim as a representative community under National Socialist rule The city's survivors remember the horror of the raid and its aftermath including eventual occupation by French Colonial troops and subsequently American forces Tony does an admirable job of presenting historical context when considering actions in times of extreme trauma and his narrative offers an intriguing engaging and poignant evocation of the closing months of Bomber Command's war **Strategic Bombing by the United States in World War II** Stewart Halsey Ross, 2015-10-03 The United States relied heavily on bombing to defeat the Germans and the Japanese in World War II and air raids were touted as precision bombing in American propaganda But was precision possible over cloud covered Europe or a darkened Japanese countryside Could the vaunted Norden optical bombsight in fact drop bombs into pickle barrels as advertised Were the American aircrews well trained and well protected How good were their airplanes What were the results of the costly raids This work sets suppositions against facts surrounding the United States use of strategic bombing in World War II Chapters cover the events leading up to World War II the start of the war the seers and the planners the airplanes bombs bombsights and aircrews the planes Germany used to defend itself against American planes the five cities Hamburg Dresden Tokyo Hiroshima and Nagasaki that experienced the most destruction and the U S Strategic Bombing Survey of the damage done by aerial bombing The book also probes the government's myth building statements that supported America's view of itself as a uniquely humanitarian nation and analyzes the role played by

interservice rivalry battleship admirals against bomber generals **Case Studies in Strategic Bombardment** R. Cargill Hall, Air Force History and Museums Program (U.S.), 1998 **Germany at War** David T. Zabecki, 2014-10-28 Written by experts for use by nonexperts this monumental work probes Germany's Genius for War and the unmistakable pattern of tactical and operational innovation and excellence evident throughout the nation's military history Despite having the best military forces in the world some of the most advanced weapons available and unparalleled tactical proficiency Germany still lost both World Wars This landmark four volume encyclopedia explores how and why that happened at the same time examining Germany as a military power from the start of the Thirty Years War in 1618 to the present day Coverage includes the Federal Republic of Germany its predecessor states and the kingdoms and principalities that combined to form Imperial Germany in 1871 The Seven Years War is discussed as are the Napoleonic Wars the Wars of German Unification including the Franco Prussian War World War I World War II and the Cold War In all more than 1 000 entries illuminate battles organizations leaders armies weapons and other aspects of war and military life The most comprehensive overview of German military history ever to appear in English this work will enable students and others interested in military history to better understand the sociopolitical history of Germany the complex role conflict has played in the nation throughout its history and why Germany continues to be an important player on the European continent **The Bombers and the Bombed** Richard Overy, 2015-04-28 An essential part of the literature of World War II Jonathan Yardley The Washington Post From acclaimed World War II historian Richard Overy comes this startling new history of the controversial Allied bombing war against Germany and German occupied Europe In the fullest account yet of the campaign and its consequences Overy assesses not just the bombing strategies and pattern of operations but also how the bombed communities coped with the devastation This book presents a unique history of the bombing offensive from below as well as from above and engages with moral questions that still resonate today **How efficient was the Strategic Bombing Offensive of the Allied Forces against Germany from 1939-1945?** Stefan Trepke, 2005-12-15 Essay from the year 2003 in the subject History of Germany National Socialism World War II grade 2 University of Westminster School of Social Science Humanities Languages course Total War A Military History of the Second World War 1939 1945 language English abstract The Strategic Bombing Offensive of the Allied Forces was one of the great military operations against Hitler Germany Despite of the meaning of the Strategic Bombing Offensive its significance and efficiency to the final victory over Hitler Germany was always a topic of controversy This controversy about the significance and efficiency of the Strategic Bombing Offensive to the final victory over Hitler Germany took not just place under the contemporaries of the Second World War as Winston Churchill and his military advisers This controversy is still alive eg in the argumentations of historians as Richard Overy 1 and Noble Frankland 2 In the following essay will be considered the efforts and results of the Strategic Bombing Offensive from 1939 to 1945 It will be discussed the efficiency of the Allied bombing to conclude finally the significance of the Strategic Bombing Offensive to the

victory over Hitler Germany For this purpose shall be considered various primary sources as the Butt Report the Singleton Report and the British and American surveys about the Strategic Bombing Offensive Beside own points of view shall be opposed the arguments of Richard Overy and Noble Frankland the two opinion leaders of this historical subject The Strategic Bombing Offensive is to understand as the strategic planning s and operations of the Bomber Command of the Royal Air Force against the Hitler Germany between 1939 and 1945 Since 1943 the entry of the US 8th Air Force and later the US 25th Air Force in the Strategic Bombing Offensive is this operation as well known as Combined Bombing Offensive The Strategic Bombing Offensive was aimed at destroying an enemy s war capacity through destroying war production 3 but also aimed were the infrastructure and the moral of the German population The first considerations about a strategic bombing war goes back to the First World War however this topic went to a real issue in late 1937 when the British Bomber Command got the order to plan the destruction of the economy of its most potential enemy Hitler Germany Despite of this effort virtually less was done as the war broke out in September 1939 The Bomber Command possessed about 488 light bombers which did not fulfill the needs Based on the lack of range and carrying capacity of bombs the demands of a realistic destruction of Germany were not practical

British Exploitation of German Science and Technology, 1943-1949 Charlie Hall,2019-01-16 At the end of the Second World War Germany lay at the mercy of its occupiers all of whom launched programmes of scientific and technological exploitation Each occupying nation sought to bolster their own armouries and industries with the spoils of war and Britain was no exception Shrouded in secrecy yet directed at the top levels of government and driven by ingenuity from across the civil service and armed forces Britain made exploitation a key priority By examining factories and laboratories confiscating prototypes and blueprints and interrogating and even recruiting German experts Britain sought to utilise the innovations of the last war to prepare for the next This ground breaking book tells the full story of British exploitation for the first time sheds new light on the legacies of the Second World War and contributes to histories of intelligence science warfare and power in the midst of the twentieth century

International Humanitarian Law Facing New Challenges Wolff Heintschel von Heinegg,Volker Epping,2007-03-06 Recent armed conflicts whether international or non international in character are in many respects characterized by a variety of asymmetries These asymmetries may be overstressed sometime even abused and ultimately virtually meaningless Still either as such or in conjunction with other developments they seem to challenge the law of armed conflicts or international humanitarian law These challenges may very well compromise the very function of that body of law which is to mitigate as far as possible the calamities of war Thus the law of armed conflict may be deprived of its fundamental function as an order of necessity because its legally binding directives will increasingly be disregarded for the sake of allegedly superior values In order to discuss these and other questions a most distinguished group of experts in the field of the law of armed conflicts gathered in Berlin in June 2005 The goal of that colloquium which marked the 70th birthday of Knut Ipsen was to find operable solutions for problems and

challenges the contemporary law of armed conflict is confronted with With contributions by Bill Boothby Michael Bothe Yoram Dinstein Knut D rmann Charles J Dunlap Jr Volker Epping Dieter Fleck Steven Haines Wolff Heintschel von Heinegg Hans Joachim Heintze Rainer Hofmann Frits Kalshoven Stefan Oeter W Hays Parks Michael Schmitt Torsten Stein and Andreas Zimmermann *Archaeology from Historical Aerial and Satellite Archives* William S. Hanson, Ioana A. Oltean, 2012-11-12 Historical archives of vertical photographs and satellite images acquired for other purposes mainly declassified military reconnaissance offer considerable potential for archaeological and historical landscape research They provide a unique insight into the character of the landscape as it was over half a century ago before the destructive impact of later 20th century development and intensive land use They provide a high quality photographic record not merely of the landscape at that time but offer the prospect of the better survival of remains reflecting its earlier history whether manifest as earthworks cropmarks or soilmarks These various sources of imagery also provide an opportunity to examine from the air areas of Europe and beyond whose skies are still not open to traditional archaeological aerial reconnaissance Tens of millions of such images are held in archives around the world but their research potential goes very largely untapped A primary aim of this volume is to draw to wider attention the existence scope and potential access to historical archival aerial and satellite photographs in order to encourage their use in a range of archaeological and landscape research By drawing attention to this massive archival resource providing examples of its successful application to archaeological landscape questions and offering advice how to access and utilise the resource the volume seeks to bring this material to wider attention demonstrate its huge potential for archaeology encourage its further use and stimulate a new approach to archaeological survey and the study of landscape evolution internationally *The Bomb* Beatrice Heuser, 2014-09-25 This tightly argued and profoundly thought provoking book tackles a huge subject the coming of the nuclear age with bombing of Hiroshima and Nagasaki in August 1945 and the ways in which it has changed our lives since Dr Heuser sets these events in their historical context and tackles key issues about the effect of nuclear weapons on modern attitudes to conflict and on the ethics of warfare Ducking nothing she demystifies the subject seeing the bomb not as something unique and paralysing but as an integral part of the strategic and moral context of our time For a wide multidisciplinary and general readership **Hamburg 1940-45** Richard Worrall, 2024-04-25 The first book to cover the full history of the RAF s air war against Hamburg one of the most important target cities in Germany The city of Hamburg became synonymous with the destructive power of RAF Bomber Command when during summer 1943 the city suffered horrific destruction in a series of four heavy firebombing attacks Operation Gomorrah However few know how varied or long the Hamburg campaign was In this book RAF air power expert Dr Richard Worrall presents the complete history of the RAF s air campaign against the city a campaign that stretched well beyond the devastating fire raids of 1943 Dr Worrall explains how Germany s second city was an industrial centre of immense proportions and proved a consistent target for Bomber Command throughout World War II It was home to oil refineries U

boat pens and ship building and submarine building yards all sustained by a large industrial workforce Bomber Command evolved tactically and technically throughout the war and the Luftwaffe's defensive capabilities would do likewise in response Drawing on a wide range of primary and secondary sources available on this topic and packed with photos artwork maps and diagrams this is an important new history of the air campaign against the industrial and naval heart of Nazi Germany The Normandy Campaign 1944 John Buckley, 2006-07-29 With essays from leading names in military history this new book re-examines the crucial issues and debates of the D Day campaign It tackles a range of core topics placing them in their current historiographical context to present new and sometimes revisionist interpretations of key issues such as the image of the Allied armies compared with the Germans the role of air power and the lessons learned by the military from their operations As the Second World War is increasingly becoming a field of revisionism this book sits squarely within growing debates shedding new light on topics and bringing current thinking from our leading military and strategic historians to a wider audience This book will be of great interest to students of the Second World War and of military and strategic studies in general Special Operations and Strategy James D. Kiras, 2006-07-29 James D Kiras shows how a number of different special operations in conjunction with more conventional military actions achieve and sustain strategic effects over time In particular he argues that the root of effective special operations lies in understanding the relationship existing between moral and material attrition at the strategic level He also presents a theoretical framework for understanding how special operations achieve strategic effects using a unique synthesis of strategic theory and case studies This study shows how the key to understanding how special operations reside in the concept of strategic attrition and in the moral and material nature of strategy It also highlights major figures such as Carl von Clausewitz Hans Delbrück and Mao Zedong who understood these complexities and were experts in eroding an enemy's will to fight These and other examples provide a superb explanation of the complexities of modern strategy and the place of special operations in a war of attrition This book will be of great interest to all students and scholars with an interest in special forces and of strategic and military studies in general *Air Power and Warfare* Elwood L. White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history Like most editions of the United States Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy It includes books reports government documents and journal articles Excluded are pictorial works newspaper articles works of fiction studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation Readers wanting information on the history of aviation certainly prior to the Wright Brothers are

encouraged to consult the U S Air Force Academy Friends of the Library publication *The Genesis of Flight The Aeronautical History Collection of Colonel Richard Gimbel* **The Psychology of Strategy** Kenneth Payne, 2015-05-15 How do strategists decide what they wish to achieve through war and how they might accomplish it And why does their understanding of violence regularly turn out to be wrong In seeking answers to these questions Kenneth Payne draws on the study of psychology to examine strategic behaviour during the Vietnam War He explores the ways in which cognitive biases distort our sense of our own agency and our decision making arguing that much of the latter is emotional shaped by unconscious processing and driven by a prickly concern for social esteem The Nixon and Johnson administrations both proved susceptible to the processes that are familiar to students of modern neuroscience and psychology but perhaps less appreciated within strategic studies US strategists in the Vietnam era miscalculated in ways that would surprise rational theorists but not evolutionary psychologists they exaggerated the stakes embraced risky and overly optimistic solutions and failed to appreciate the limits of force to shatter the enemy s resolve Their concern for reputation led to escalation based on a flawed conception of what such escalation could achieve The Vietnam conflict provides an excellent illustration that war is an inherently psychological phenomenon This challenges abstract notions of rationality in strategic affairs suggesting that the strategists much like the rest of us are strangers to themselves *Commemorating Hell* Gretchen E. Schafft, Gerhard Zeidler, 2011-02-01 This powerful wide ranging history of the Nazi concentration camp Mittelbau Dora is the first book to analyze how memory of the Third Reich evolved throughout changes in the German regime from World War II to the present Building on intimate knowledge of the history of the camp where a third of the 60 000 prisoners did not survive the war Gretchen Schafft and Gerhard Zeidler examine the political and cultural aspects of the camp s memorialization in East Germany and after 1989 in unified Germany Prisoners at Mittelbau Dora built the V 1 and V 2 missiles some of them coming into direct contact with Wernher von Braun and Arthur Rudolph who later became leading engineers in the U S space program Through the continuing story of Mittelbau Dora from its operation as a labor camp to its social construction as a monument Schafft and Zeidler reflect an abiding interest in the memory and commemoration of notorious national events In extending the analysis of Mittelbau Dora into post war and present day Germany *Commemorating Hell* uncovers the intricate relationship between the politics of memory and broader state and global politics revealing insights about the camp s relationship to the American space pioneers and the fate of the nearby city of Nordhausen **The Defeat of the Enemy Attack upon Shipping, 1939-1945** Eric J. Grove, 2019-08-21 This book was originally published in 1957 During the First World War German use of unrestricted submarine warfare supported by extensive mining and surface raids very nearly forced Britain out of the war in 1917 The island s heavy dependence on seaborne supplies was gravely threatened again in 1939 supplemented this time by air attacks on shipping After the war Commanders Waters and Barley wrote a Naval Staff History which has long been recognised as an authoritative study of the impact of the German campaign and its ultimate

defeat by Britain and her allies It remains an indispensable basis for any serious study of the Battle of the Atlantic and has here been updated and revised by Dr Grove who also contributes a perceptive introduction outlining its significance
