## **Strategic Investment Decisions:**

*Strategic Investment Decisions* Richard Butler, 1993-01-01      *Strategic Investment Decisions in Regulated Markets* Christian Wernick, 2007-09-25 Most network industries throughout Europe are subject to sector specific regulation with large impact on market structures and results Consequently questions related to regulatory designs and their effects on market outcomes become more and more important in business and politics as well as in scholarly research Concentrating on Germany and the UK Christian Wernick provides the reader with insights on the effects of different regulatory strategies which take place under a common European regulatory framework Combining theoretical analyses and empirical material a sophisticated and balanced picture on the coherences between regulation and investment behaviour in Germany's and the UK's broadband markets is presented      **Managing Strategic Investment Decisions in Large Diversified Companies** Paul R. Marsh, 1988      *Strategic Investment Decisions* Hele Hammer, 2009 Value of any firm could be viewed as the sum of the value of its investment projects Thus making correct strategic investment decisions is of critical importance to maximizing the value of the firm In finance literature decision making has usually been studied using the scientific rather than the organizational model In contrast the current work combines both corporate finance theory and the organizational decision making theory Related to that is the choice of methodology for empirical research quite uncommonly both positivist and interpretive methods are used to study the investment decisionmaking in practice In addition to a written survey six in depth case studies were carried out Furthermore as most research on this topic has focused on big companies in Anglo Saxon countries studying smaller companies in a smaller country Estonia adds some interesting perspectives to the issue The study could be of interest to all professionals in Corporate Finance and General Management field      **Strategic Investment** Han T. J. Smit, Lenos Trigeorgis, 2012-01-12 Corporate finance and corporate strategy have long been seen as different sides of the same coin Though both focus on the same broad problem investment decision making the gap between the two sides and between theory and practice remains embarrassingly large This book synthesizes cutting edge developments in corporate finance and related fields in particular real options and game theory to help bridge this gap In clear straightforward exposition and through numerous examples and applications from various industries Han Smit and Lenos Trigeorgis set forth an extended valuation framework for competitive strategies The book follows a problem solving approach that synthesizes ideas from game theory real options and strategy Thinking in terms of options games can help managers address questions such as When is it best to invest early to preempt competitive entry and when to wait Should a firm compete in R D or adopt an accommodating stance How does one value growth options or infrastructure investments The authors provide a wide range of valuation examples such as acquisition strategies R D investment in high tech sectors joint research ventures product introductions in consumer electronics infrastructure and oil exploration investment Representing a major step beyond standard real options or strategy analysis and extending the power of real options and strategic thinking in a rigorous

fashion Strategic Investment will be an indispensable guide and resource for corporate managers MBA students and academics alike

*Strategic Investment Decisions* Chris Carr, 2000 John Shank in this special edition summarises the argument for complementing a capital budgeting approach to investment decisions with a broader strategic cost management SCM accounting approach incorporating three additional tools \_\_ value chain analysis cost driver analysis and competitive advantage analysis This article first discusses how this new framework might be assessed empirically and then examines the application of these techniques in practice drawing on 51 case studies of strategic investment decision in 44 companies in Britain and Germany including U S subsidiaries in both countries There are

substantial international differences German companies placing much more emphasis on strategy in their approach In general compared with successful companies successful companies placed proportionately five times as much attention on the issue of competitive advantage almost three times as much on value chain considerations and twice as much on cost drivers commensurably less attention was placed on traditional capital budgeting techniques Finally we draw conclusions on the role of the finance function and of such techniques within the context of strategic planning
