Chohan,2020-09-03 Public value theory speaks to the co creation of value between politicians citizens and public managers with a focus on the public manager in terms of her contributions initiatives and limitations in value creation But just who are public managers Public value regularly treats the public manager as synonymous with bureaucrat government official civil servant or public administrator However the categories of public managers represent a more versatile and expansive set of agents in society than they are given credit for and the discourse of public value has typically not delved sufficiently into the variety of possible cadres that might comprise the public manager This book seeks to go beyond the assumed understandings of who the public manager is and what she does It does so by examining the processes of value creation that are driven by non traditional sets of public managers which include the judiciary the armed forces multilateral institutions and central banks It applies public value tools to understand their value creation and uses their unique attributes to inform our understanding of public value theory Tailored to an audience comprising public administration scholars students of government public officials practitioners and social scientists interested in contemporary problems of values in society this book helps to advance public administration thought by re examining the theory s ultimate protagonist the public manager It therefore constitutes an important effort to take public value theory forward by going beyond conceptions of the public manager as she has thus far been understood **Public Value Theory and Budgeting** Usman W. Chohan,2019-05-22 Public value theory has advanced over the past 30 years but there is a need to extend its boundary outwards into new contexts and update its discourse to reflect new social challenges We are now trying to create value in a globalized world with supranational entities with new international alliances and institutions in a frightening post truth era How can public managers grapple with these emerging realities This book seeks to provide answers to such public value questions by applying powerful budgeting perspectives Using case studies of independent budget offices key fiscal instruments and leading public value frameworks this book stands out in its use of budgetary lenses to answer pertinent questions about the multidimensional processes of value creation by and for a wider society Pushing the debate on public value forward and taking it onto the global stage the book asks whether public value and other public administration theories are applicable beyond the traditional context of the pro globalization Western liberal democracies in which they were conceived It does this by exploring the realms of developing countries supranational entities

and post Communist societies among others Finally it presents these explorations in light of very recent sociopolitical trends and phenomena including the growth of civil society the global financial crisis the illiberal democracy and the post truth era Tailored to an audience comprising public administration scholars students of government budget practitioners and social scientists interested in contemporary problems of values in society this book helps to advance public administration thought by extending public value theory into new contexts and relating it to the growing global challenges of public life

Public Value and the Digital Economy Usman Chohan, 2021-07-29 How can the public manager create and co create value in the digital economy While there is much exciting work being done there is a pressing need to recontextualize public value theory PVT specifically in terms of its theoretical precepts in the fluid and dynamic environment that the digital economy has produced Much of the theoretical undergirding of PVT predates the full onset of today s digital economy leaving aside phenomena including citizen driven innovations decentralized digital structures and the algorithmic foundations of new economic life This is why a conceptually driven exercise in contemporizing PVT would be of great value to public administration s theoreticians seeking to lead the theory in catching up to the praxis This book seeks to answer the question of creating and co creating public managerial value by developing chapters that revisit categories central to the functions of public managers in relation to other value creating agents under PVT It introduces new and important lenses to PVT that are grounded in the praxis of the digital economy raising new questions about old problems in PVT and generating newer formulations that push PVT forward and make its debates salient to the futures that lay before the modern public manager The book therefore constitutes an important effort to take PVT forward by shedding new light on the potency of the public manager in confronting and constructing the digital economy through co creation with the other agents of public value It will be of interest to researchers academics and policy makers in the fields of public and nonprofit management public administration and policy and PVT
