Practitioner's Guide to Behavioral Problems in Children Glen P. Aylward, 2012-12-06 Over the last 25 years of clinical practice I have been impressed with a paradox namely the uniqueness in each child in contrast to the frequent commonalities found in the development of behavioral problems I have also been duly impressed with the resilience of children and their families and the impact that provision of knowledge regarding development and behavior can have on facilitating this resilience Guidance provided by the practitioner to caretakers can have a tremendous influence in altering the of a behavioral concern particularly if this guidance is provided course early in the evolution of the potential problem and is directed toward skill development in the parents Moreover if parents can be provided with basic principles of behavior and are able to self monitor their reactions to the behaviors of their child the likelihood of a positive outcome is enhanced With these considerations in mind the purpose of this book is two fold First it provides a quick reference for the practitioner regard ing parenting child development and conceptualizing identifying and treating behavioral concerns The text is geared

to be a practical quick read which the practitioner can use in anticipatory guidance or first tier interventions The second purpose is to provide a reference for parents More specifically clinicians may recommend the book to parents as a so called bibliotherapeutic aid either to be read independently or used in conjunction with an intervention program provided by the practitioner

Handbook of Research on Emotional and Behavioral Disorders Thomas W. Farmer, Maureen A. Conroy, Elizabeth M.Z. Farmer, Kevin S. Sutherland, 2020-03-26 The Handbook of Research on Emotional and Behavioral Disorders explores the factors necessary for successful implementation of interventions that foster productive relationships and ecologies to establish reinforce and sustain adaptive patterns of emotional and behavioral functioning across childhood and into adulthood Although there has been a concerted focus on developing evidence based programs and practices to support the needs of children and youth with emotional and behavioral disorders there has been less emphasis on the developmental social and environmental factors that impact the implementation and effectiveness of these approaches Chapters from leading experts tackle this complexity by drawing on a range of disciplines and perspectives including special education mental health services school clinical and community psychology social work developmental psychology and psychopathology and prevention science An essential resource for scholars and students interested in emotional and behavioral disorders this volume crafts an essential framework to promote developmentally meaningful strategies for children and youth with even the most adverse experiences and intensive support needs

Behavioral Strategy in Perspective Mie Augier, Christina Fang, Violina Rindova, 2018-09-21 Behavioral strategy has evolved as a field the last decades both intellectually and institutionally This volume examines the relatively new field of behavioral strategy and its contribution to strategic management with papers reflecting the past and present of behavioral strategy as a field as well as possible avenues for future developments

Parent-training Programmes for the Management of Young Children with Conduct Disorders Joanna Richardson, Carol Joughin, 2002 Conduct disorders are the most common form of problems referred to child and adolescent mental health services The appropriate management of children with conduct disorders is an important public health issue with significant financial implications for health education social services and other agencies This book presents key research relating to the use of parent training programmes for the treatment and prevention of conduct disorders in young children It includes An overview of definitions epidemiology long term outcomes risk factors and assessment Summaries of previous systematic reviews in this area New research presented and critically appraised Discussion of current provision of parent training programmes in the UK It will assist clinicians managers and commissioners and all other professionals involved in the management of young children with conduct disorders to adopt an evidence based approach to practice
