Strategic Partners:

Strategic Partners Jeanne Wilson, 2015-06-11 Russia's foreign policy experience in the first post Soviet decade was marked by disappointments as well as surprising turns. Expectations that Russia would join the Western powers as an equal partner were frustrated while relations with the People's Republic of China warmed considerably. Today Russia's relationship with China is an important component of its overall foreign policy orientation as the two states, one greatly diminished the other clearly on the rise, have found themselves sharing an interest in curbing the power of the United States. In analyzing Russia's evolving foreign policy vis-à-vis China, the author takes into account the legacy of Soviet era precedents, the simultaneous processes of economic policy change and integration into global economic structures and military relations. By shedding light on the role of political realism, decision makers and exogenous factors in Russian foreign policy, this analysis of an important bilateral relationship contributes to the larger project of understanding international relations and the dynamics of domestic and foreign policy change.

Creating Strategic Partnerships Marilyn J. Amey, Pamela L. Eddy, 2023-07-03 What are the characteristics and conditions that lead to successful educational partnerships? What can we learn from partnerships that fail, cannot be sustained over time, or cease to benefit their partners? This book serves as a guide to the successful implementation of partnerships. It provides the context and tools for readers who are responding to the increasing demands of policy makers, funders, and institutional leaders to use partnerships to address local, state, and federal issues, achieve external mandates, meet public or internal agendas, or pursue international collaborations. This guide provides an evidence-based framework for institutional and organizational leaders to develop the vision, shared values, and norms to achieve the partnership capital that will sustain an enduring relationship. It offers a three-phase model of the development process of collaboration, together with a tool box for those charged with partnering and leading organizational change, and includes a template for both creating new partnerships and sustaining existing ones. The authors start by differentiating between traditional, often ad hoc, partnerships and strategic partnerships that align organizational strategy with partnership actions, and by identifying the importance of moving beyond incremental or surface, first-order change to develop deep, second-order change through which underlying structures and operations are questioned and new processes emerge due to the partnership. They offer analyses and understandings of seven key components for success: exploring motivations, developing partner relationships, communicating and framing purpose, creating collaborative structures and resources, leading various partnership stages, generating partnership capital, and implementing strategies for sustaining partnerships. Each chapter concludes with a case study to provide more understanding of the ideas presented and for use in training or classes. This guide is addressed to policy makers and educational leaders, college administrators, and their non-profit and business partners to enable them to lead and create strategic partnerships and facilitate organizational change.
