Strategic Power And Soviet Foreign Policy:

Strategic Power and Soviet Foreign Policy Arnold Lawrence Horelick, Myron Rush, 1965 **Strategic power and Soviet foreign policy** Arnold Lawrence Horelick, Myron Rush, *Strategic Power and National Security* J. I. Coffey, 2010-11-23 In this closely reasoned and lucid analysis an important thinker on American strategy surveys weapons technology and its military and political implications for the 1970s J I Coffey refutes the argument that American national security requires superior strategic offensive forces or extensive air and missile defenses In so doing he assesses in simple terms the various factors involved in this complex and difficult subject While many books on strategy deal only with a single area or a particular weapons system this work synthesizes technical and non technical considerations across the whole range of national security issues affected by strategic power war fighting deterrence Communist behavior alliance relationships nuclear proliferation and arms control Its orderly and authoritative marshaling of tabulated data its citations from Department of Defense documents and congressional hearings and its classifications of the alternative options which strategy makers can now pursue are all invaluable to both the student of national security and the professional strategist **Soviet Foreign Policy in a Changing World** Robbin F. Laird, Erik P. Hoffmann, 2021-03-22 No detailed description available for Soviet Foreign Policy in a Changing World Strategic Power Carl G. Jacobsen, 1990-02-23 This book highlights the impact and relevance of strategic culture Each section contains essays contrasting United States and Soviet perceptions on specific topics Each section closes with a synthesizing commentary to help readers to get a better sense of differences and similarities *USSR: Strategic Survey* United States. Department of the Army, 1969 **National Security Affairs Conference : Long Range US-USSR Competition : National Security Implications** , 1976 **National Security, Military Power & the Role of Force in International Relations** United States. Department of the Army, 1976 **Nuclear Strategy in the Twenty-First Century** Stephen J. Cimbala, 2000-05-30 The future of nuclear weapons and nuclear strategy in the 21st century is not entirely predictable from the Cold War past Nor is it easy to foresee on the basis of what has happened since the Soviet Union collapsed in 1991 Cimbala contends that nuclear weapons and the psychology of nuclear deterrence will remain important after 2000 but the character of that importance will change No longer will nuclear weapons be the dominators of military technology Instead advanced technology conventional weapons based on information and electronics will supplant nuclear weapons as the instruments of military supremacy in the 21st century What Cimbala asks can be expected of nuclear weapons in the 21st century given what we have learned from previous experience in the Cold War and in the 1990s Cimbala expects that nuclear weapons will spread among currently non nuclear states and states with regional grievances or hegemonic aspirations will seek to deploy small nuclear forces as deterrents against neighbors or against outside intervention by the United States in regional conflicts Regional rogue states may also obtain nuclear weapons Nonetheless as Cimbala explains the international balance of power is unlikely to change As he makes clear power will be less dependent on

deployed military platforms and more dependent on information warfare A thoughtful and provocative analysis that will be of particular interest to policy makers scholars and other researchers involved with arms control security studies and international relations

We All Lost the Cold War Richard Ned Lebow, Janice Gross Stein, 1995-07-03 Drawing on recently declassified documents and extensive interviews with Soviet and American policy makers among them several important figures speaking for public record for the first time Ned Lebow and Janice Stein cast new light on the effect of nuclear threats in two of the tensest moments of the Cold War the Cuban Missile Crisis of 1962 and the confrontations arising out of the Arab Israeli war of 1973 They conclude that the strategy of deterrence prolonged rather than ended the conflict between the superpowers

Great Power Security Cooperation David W. Kearn, 2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to

their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches
