policymakers to present their perspectives ideas and to challenge researchers and senior staff of the World Bank and other organizations with their views These papers look at a number of compelling issues surrounding the topic of development

Community Economic Development Graham Haughton,2013-12-16 This important book examines the ways in which community economic development can contribute to local and regional regeneration It presents a unique overview of the state of contemporary British practice in this important policy area and provides a series of fresh theoretical methodological and empirical insights which help us to understand ways in which communities are facing up to the challenges of devising and bringing about their own revitalisation Community Economic Development is underpinned by the argument that much conventional regeneration work represents at best a short term fix rather than a long term sustainable solution to the problems of socially excluded communities The emphasis of the book is largely on the British experience with contributions from a rich mix of new and established academics and practitioners

Employment Policies and Multilevel Governance Roger Blanpain,Brian Langille,2009-04-29 In Europe work has long been a symbol of full citizenship and today work is a fundamental goal of European social policy However although every person has the right to work it is becoming clearer all the time that unemployment is not due merely to a lack of encouragement to exercise this right but at least in part to some deeper defects in the implementation of effective employment policies As a contribution to defining the nature of these problems this important collection of essays targets the phenomena of multilevel governance both vertical European national regional local and horizontal administrative institutions trade unions business representatives NGOs showing with detailed analysis and data how coordination or conflict between the various levels advances or fails to advance the goals of employment policy Regarding the EU five EU Member States are examined plus for comparative analysis the parallel Canadian federal model with the authors addressing such concrete issues as the impact of globalisation and Europeanisation on employment policies distribution of tasks in the Open Method of Coordination OMC involvement of private and economic agents the increasing significance of international political agents flexicurity as an employment strategy the difficulty of integrating the excluded coordination with education and fiscal policies social inclusion from the point of view of international human rights and gender mainstreaming as a weakening of the EU guarantee of gender equality The essays originated in a research meeting held at the Instituto Internacional de Sociologia Juridica at Oati Spain in June of 2007 Some of the contributors all employment law experts discuss problematic aspects of the European Employment Strategy EES and its influence on the decentralization of employment policies and related elements of social protection Other authors concentrate on built in multilevel problems resulting from existing constitutional and administrative structures while a third group focuses on substantive approaches to employment policies within individual member states The Bulletin contains updated versions of all papers In this book the degree of administrative legal political and cultural intricacy involved in a serious engagement with multilevel governance of employment on the European model is put on full view As a deeply

informed analysis of how the idea of multilevel governance has played out within the political and administrative reality of Member States the book will prove of enormous value to labour and employment law professionals anywhere as the problems identified here have a global reach Creating a Sustainable Ecology Using Technology-Driven Solutions Carayannis, Elias G.,2013-03-31

As advancements in technology continue to influence all facets of society its aspects have been utilized in order to find solutions to emerging ecological issues Creating a Sustainable Ecology Using Technology Driven Solutions highlights matters that relate to technology driven solutions towards the combination of social ecology and sustainable development This publication addresses the issues of development in advancing and transitioning economies through creating new ideas and solutions making it useful for researchers practitioners and policy makers in the socioeconomic sectors *Tied Aid and Development Aid Procurement in the Framework of EU and WTO Law* Annamaria La

Chimia,2014-07-18 This book is the first legal treatment of tied aid and examines in detail the compatibility of tied aid with EU and WTO law The workings of the aid projects and aid procurement systems of donor countries granting bilateral aid are fully examined through case studies from the UK Italy the EU and the US Tied aid refers to aid granted to developing countries on condition that goods and services for the aid financed projects are purchased from the donor country only The recipient country in order to receive the grant or the loan has no other choice but to fulfil the condition imposed by the donor Economists have shown that tying aid undermines the effectiveness of aid It leads to higher costs paid for the goods and services purchased and the distortion of the nature of the aid Further tying frustrates the potential of aid to foster trade between developing countries in many of these countries public bodies and in particular aid financed projects are major potential outlets for trade between neighbouring states The importance of tied aid has been pointed out in economic literature but there is surprisingly little written on the legal aspects of tied aid practices and this book seeks to fill this major gap in the literature The book is of interest to academics in the field of EU and WTO law NGOs and practitioners working both in the field of public procurement and development policies *Chad Investment and Business Guide Volume 1*
