methodologies It provides a critical guide to existing concepts and methods exploring how museum display can be understood using semiotic narrative cartographic and spatial analyses assemblage theory new materialist and multisensory approaches and theories of affect emotion and historical positioning Alongside this Whitehead presents key orientations for research practice relating to objectivity and subjectivity historical and contextual awareness and mixing methods Analysing Museum Display will be essential reading for scholars and students of museology at all levels The book will also appeal to museum curators and professionals who are involved in the production of displays and wish to develop a more theorised and reflective perspective on their own practice *Archival Film Curatorship* Grazia Ingravalle, 2025-10-01 Archival Film

Lien, 2016-02-17 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume

emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe **Augmented Images** Lars C. **Experimental Museology** Marianne Achiam, Michael Haldrup, Kirsten Drotner, 2021-06-28 Experimental Museology scrutinizes innovative endeavours to transform museum interactions with the world Analysing cutting edge cases from around the globe the volume demonstrates how museums can design apply and assess new modes of audience engagement and participation Written by an interdisciplinary group of researchers and research led professionals the book argues that museum transformations must be focused on conceptualizing and documenting the everyday challenges and choices facing museums especially in relation to wider social political and economic ramifications In order to illuminate the complexity of these challenges the volume is structured into three related key dimensions of museum practice namely institutions representations and users Each chapter is based on a curatorial design proposed and performed in collaboration between university based academics and a museum Taken together the chapters provide insights into a diversity of geographical contexts fields and museums thus building a comprehensive and reflexive repository of design practices and formative experiments that can help strengthen future museum research and design Experimental Museology will be of great value to academics and students in the fields of museum gallery and heritage studies as well as architecture design communication and cultural studies It will also be of interest to museum professionals and anyone else who is interested in learning more

Accumulation by Segregation Ghazala Jamil, 2017-08-09 This work explores the processes of creation and articulation of social identities of Muslims in Delhi Mapping the landscape of discrimination in Delhi's neighbourhoods Jamil tries to see how such fractured geographies are created We come across people whose sense of belonging to each other is complex and subject to forces such as regional and class identities instead of an ubiquitous Muslimness Segregation in an urban space is produced as Jamil argues not only by communal conflict and threat of violence but also maintained and strengthened by processes of capitalist globalization Through case studies of five localities which present a historical continuity in the narrative of Delhi's Muslims the book presents compelling evidence of market and governance processes that aid accumulation by segregation It offers an against the grain reading of quotidian practices of residents within such boundaries such that a counternarrative of resistance and hope may emerge one that may allow for re imagining alternatives
