Strategies Of Knowledge Acquisition:

The Acquisition of Strategic Knowledge Thomas R. Gruber, 2013-07-10 The Acquisition of Strategic Knowledge deals with the automation of the acquisition of strategic knowledge and describes a knowledge acquisition program called ASK which elicits strategic knowledge from domain experts and puts it in operational form This book explores the dynamics of intelligent systems and how the components of knowledge systems including a human expert interact to produce intelligence Emphasis is placed on how to represent knowledge that experts require to make decisions about actions The move toward abstract tasks and how tasks are solved are discussed along with their implications for knowledge acquisition particularly the acquisition of expert strategies This book is comprised of eight chapters and begins with an overview of the knowledge acquisition problem for strategic knowledge as well as the relevance of strategic knowledge to artificial intelligence The next chapter describes a dialog session between the ASK knowledge acquisition assistant and the user the expert The discussion then turns to software architecture with which to represent strategic knowledge design and implementation of an assistant for acquiring strategic knowledge and approaches to knowledge acquisition Two applications of the ASK system are considered to evaluate the usability of the elicitation technique with real users and to test the adequacy of the strategy rule representation upon which the approach is dependent The scope of ASK its sources of power and its underlying assumptions are also outlined This monograph will be a valuable resource for knowledge systems designers and those interested in artificial intelligence and expert systems Strategies of Knowledge Acquisition ,1995 Monographs of the Society for Research in Child Development ,1935 **Knowledge Acquisition Using Multiple Learning Strategies** Ning Liu,1992

Environment Katja Rajaniemi, Tom Wingren, 2005 **Knowledge Strategies** Constantin Bratianu, 2022-08-11 Knowledge is a strategic resource of any organization and its deployment is critical in achieving a sustainable competitive advantage Knowledge strategies were born at the intersection of strategic thinking and knowledge management Strategic thinking is a mental process of understanding the future and based on that understanding of searching for practical ways of achieving a competitive advantage on the market Strategic thinking is operating in the opportunity space of the organization The book explains the strategizing process and presents the knowledge strategies as a result of that complex mental process Organizations can design deliberate and emergent knowledge strategies which can be integrated into the corporate vision and its strategies *Knowledge Acquisition: Selected Research and Commentary* Sandra Marcus, 2012-12-06 What follows is a sampler of work in knowledge acquisition It comprises three technical papers and six guest editorials The technical papers give an in depth look at some of the important issues and current approaches in knowledge acquisition The editorials were produced by authors who were basically invited to sound off I've tried to group and order the contributions somewhat coherently The following annotations emphasize the connections among the separate pieces Buchanan's editorial starts on

the theme of Can machine learning offer anything to expert systems He emphasizes the practical goals of knowledge acquisition and the challenge of aiming for them Lenat's editorial briefly describes experience in the development of CYC that straddles both fields He outlines a two phase development that relies on an engineering approach early on and aims for a crossover to more automated techniques as the size of the knowledge base increases Bareiss Porter and Murray give the first technical paper It comes from a laboratory of machine learning researchers who have taken an interest in supporting the development of knowledge bases with an emphasis on how development changes with the growth of the knowledge base The paper describes two systems The first Protos adjusts the training it expects and the assistance it provides as its knowledge grows The second KI is a system that helps integrate knowledge into an already very large knowledge base
