Philosophical Perspectives on Power and Domination, 2021-09-20 The essays in this volume explore in detail many of the ways power structures our daily personal political and intellectual lives and evaluate the workings of power using a variety of theoretical paradigms from Hobbesian liberalism to Foucauldian feminist postmodernism Taken as a whole the book aims towards an end to unjust and destructive uses of power and the flowering of an encouraging educated empowerment for all human beings in a pluralistic world Section I offers a progressive chain of arguments that moves from the acceptance of domination through the rejection of domination and finally to a new vision of power based on equality and mutual respect Section II explores the questions how is the philosophical self that is our very understanding of who we are implicated in the web of power and domination Section III responds to political realism as it explores morally ideal solutions to the global problems of poverty war and hunger Section IV discusses ways in which our thought and practice in both public and private life are bound up in hierarchies of domination

Morality among Nations Mary Maxwell, 1990-07-05 Morality among Nations a rejoinder to Hans Morgenthau's Politics among Nations offers a pathbreaking synthesis of sociobiology and international relations theory It shows that two different moralities evolved in human pre history one the standard morality from which abstract ethical principles arise concerning such things as obligation and justice and the other group morality or the proclamation of the group's right to survive and its superiority over other groups Part One surveys the philosophical literature on the question of international morality introducing arguments offered by both classical theorists such as Machiavelli Hobbes and Grotius as well as twentieth century writers such as Reinhold Niebuhr Hedley Bull Richard Falk and Charles Beitz Part Two presents the relevant sociobiological theories focusing on Robert Trivers work on the evolution of moral emotions and Richard Alexander's and Pierre van den Berghe's work on the evolution of group behavior and ethnocentrism Part Three analyzes the traditional philosophical work on international morality in light of new sociobiological ideas

How to Think Like an Officer Reed Bonadonna, 2020-09-01 The U S military invests heavily in time and resources to train its officers to be leaders in the broadest sense forming them not only in military art and science strategy tactics command etc but also in humanistic knowledge character and values as well as how to apply this education on a lightning fast battlefield or within an inertially slow bureaucracy The military develops its leaders at the service academies and in ROTC programs through very specific but also broad and deep education a way of thinking that also has wide application in the civilian world not only in various professional fields that need leaders and thinkers but also among military history enthusiasts who want to understand how officers have thought across time and among American citizens who want and really need to understand how our military leaders think how they advise presidents how they lead on the battlefield In a genre busting book that spans Stackpole's two longstanding military programs reference and history Reed Bonadonna describes how officers think how they ought to think how they develop their skills and how they

can improve these skills as well as how average civilians and citizens can learn from the example of military officers and their program of education Bonadonna draws from military history from military arts and science from literature and science and more to show how officers develop their critical thinking and problem solving skills A military officer is often called upon to be not only fighter and leader but also negotiator organizer planner and preparer teacher writer scientist and advisor and needs broad learning This is a deeply learned and insightful book one that cites Lincoln Grant Patton Eisenhower Marshall and Churchill as easily as Sun Tzu and Clausewitz not to mention Homer Plato Joseph Conrad Henry James Wilfred Owen Robert Graves George Orwell Ludwig Wittgenstein Joseph Heller Phil Klay and even Jane Austen The book is descriptive as well as prescriptive and should find eager readers inside the military where officers take seriously their professional education and their professional reading lists as well as outside where many look to the military to military reading lists and to military history to glean lessons for life and work

Righteous Realists Joel H. Rosenthal, 2002-03-01 Political realism in post World War II America has not been about power alone but about reconciling power with moral and ethical considerations The caricature of realism as an expression of amoral realpolitik has been inadequate and false for realism in the nuclear age has pivoted as much on moral principles as on power politics Joel H Rosenthal s survey of five noteworthy self proclaimed political realists explores the realists overarching commitment to transforming traditional power politics into a form of responsible power commensurate with American values Hans Morgenthau George Kennan Reinhold Niebuhr Walter Lippman and Dean Acheson the most important and prolific of the American realists all fought the excesses of crusading moralism while simultaneously promoting a concept of power politics that retained a moral component at its core This is the story of how architects of containment present at the creation of the new bipolar world shaped by the threat of mutual assured destruction became ardent critics of that world It describes realism as a product of a particular time and place a set of values assumptions processes of moral reasoning and views about America s role in the world Much of the current scholarship on the modern American realists dwells on the alleged inconsistencies of realism as a political theory and the tortuous mixture of piety and detachment exhibited in the lives of the realists themselves Rosenthal takes the opposite tack assembling the ties that bind realism into a coherent world view rather than deconstructing it into irreconcilable fragments Rosenthal maintains that the postwar American realists may be best understood as products of the historical and cultural context from which they emerged Their attempts to articulate a public philosophy and integrate values into decision making in international affairs reflected their views on both the way the world is and the way the world ought to be This study explains realism as an effort to articulate a prescriptive framework for working toward the ideal while living in the real In doing so it reveals the realists insistence on evaluating competing claims and on accepting paradox as an inevitable component of moral choice
