Strategy and AI Harry Katzan Jr., 2024-08-27 This book is intended to assist its reader to enter the world of AI inspired writing It doesn't do the entire job of writing a letter essay term paper or a book It is a serious step in the direction of assisting the writer is doing what is often a time consuming task and possibly a tedious one The basic idea is that when a person normally writes something they almost always have to look things up and then write about them If the needed information is peripheral to the main subject on which the author is writing you have to find the information before you can include it With Generative AI the process of writing is better and faster Information that would ordinarily be impossible to obtain is now available The process uses a generative transformer named ChatGPT that is readily available to all users The process is called easy writing How does this easy

writing work The author gets an idea and delineates the areas for which he needs information He or she sends a request in the form of a query to ChatGPT and then the software returns the answer The author then combines the various forms of information to construct whatever the original idea entails It s that simple It s your story or report or message or request so you can use the generated information in any way you desire In this book the title of each chapter is the subject for the query and the following text is the book chapter generated by generative computing As far as this book is concerned you are reading you may copy it in whole or in part and distribute it in any form you wish If you change it please take my name off of it There is only one limitation You can t sell it How would I know To make money you need distribution The book in which this short note is contained was written with the help of AI More specifically I used ChatGPT I chose strategy as the main topic It is a subject that I knew something about but not very much The content is useful and many persons can benefit from reading it There is also information on Singularity AI Ontology ELIZA and the Turing Test all a part of AI Each and every chapter was written using the AI system I am going to refer to it as Chat My only contribution was the selection of subjects and cleaning up the various Chat entries A typical query to Chat is What is Service Strategy You will get a relevant response and I guarantee you that Chat was not an English major The author s job is to select the overall subject matter as is the subject strategy in this case as well as artificial intelligence in the second part of the book The author s second job is to perform a copy editing of the subject matter By looking at the subject matter you will see some corrected text and some that was not corrected Some uncorrected text is included to give an idea of what has to be done Chat performs the research for you and that is the idea of what A computer written book is all about Perhaps in the future AI will select the subject matter and the various topics
