Faulkner,Andrew Campbell,2006-04-06 Presents an analysis of how thinking on strategy has evolved and what are the likely developments This work includes chapters on six key areas Approaches to Strategy Strategic Analysis and Formulation Corporate Strategy International Strategy Strategies of Organizational Change and Strategic Flexibility and Uncertainty Military Strategy of Small States Håkan Edström,Dennis Gyllensporre,Jacob Westberg,2018-09-03 The book explores how small states adjust their military strategies in response to external shocks Using primary sources from four Nordic countries Denmark Finland Norway and Sweden this volume explores how small states have adjusted their military strategies in response to external shocks of the 21st century The 9 11 terrorist attacks the Russian interventions in Georgia and Ukraine and the rise of the Islamic State have all forced the Nordic states to adopt new strategies While the responses have not been uniform their differing relations to the EU and NATO have not prevented these countries from behaving similarly in military affairs Limitations in military capacity has led all four countries to pursue strategies that include cooperation with more resourceful partners It is necessary for them to cooperate with others to protect and promote their national interests Moreover the Nordic cosmopolitan outlook expresses milieu shaping ambitions that we generally would not expect small states to pursue against a potential great power aggressor This book will be of much interest to students of military strategy defense studies security studies and international relations China's New Global Strategy Suisheng Zhao,2020-06-29 Rising as a global power and regarding the existing world order unjust and unreasonable enough to meet the interests of both itself and other emerging powers China has demanded reform to global

governance and taken new initiatives using its new quotient of wealth and influence to draw countries into its orbit This comprehensive volume focuses on the two most important of these initiatives the Belt and Road Initiative BRI launched in 2013 to strengthen China's connectivity with a large part of the world through infrastructure and economic development and the Asian Infrastructure Investment Bank AIIB created in 2015 which represented China's effort in the reconstruction of the international development rules This book explores how these two initiatives are central to China's emerging global strategy The authors examine China's geopolitical and geo economic motivations and domestic political dynamics in launching these two initiatives They also investigate the responses from the major foreign partners involved in both initiatives This book will be of great interest to students academics and researchers of China's emerging global strategy It comprises articles originally published in the Journal of Contemporary China **Toward a Strategy of Interdependence** Lincoln P.

Scott,ARMY WAR COLL STRATEGIC STUDIES INST CARLISLE BARRACKS PA.,1974 The author examines international economic interdependence of nations and its political and strategic implications

Mortal Friends, Best Enemies Celeste A. Wallander,2018-05-31 Several hundred thousand members of the Red Army were stationed in East Germany when that state was reunited with its western counterpart The peaceful transfer of these soldiers to their homeland produced a welcome outcome to a potentially explosive situation Through an investigation of the strategies of German and Russian decision makers Celeste A Wallander explores what conditions facilitate or hinder international cooperation in security matters Wallander spent the months and years after the fall of the Berlin Wall interviewing officials and politicians from Germany and Russia She reveals how these individuals assessed and responded to potential flashpoints the withdrawal of Russian military forces from Germany the implementation of arms control treaties the

management of ethnic and regional conflicts She also examines the two states views on the enlargement of NATO The first detailed account from both countries perspectives of the extraordinary contraction of Russian power and the implications of German unification Mortal Friends Best Enemies clearly depicts the important role European and global institutions played making the military disengagement possible Wallander draws on these findings to develop a new institutional theory of security relations In it she defines the techniques that international institutions can use to help states solve obstacles to security

Strategy and Defence Planning Colin S. Gray, 2014-06-26 Strategy and Defence Planning Meeting the Challenge of Uncertainty explores and examines why and how security communities prepare purposefully for their future defence The author explains that defence planning is the product of interplay among political process historical experience and the logic of strategy The theory of strategy best reveals both the nature and the working of defence planning Political ends strategic ways and military means all fed by reigning if not always recognized assumptions organize the subject well with a template that can serve any time place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book s title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough
