*The Modern Theory of the Toyota Production System* Phillip Marksberry, 2012-11-27 Numerous books have been written about Toyota's approach to workplace improvement however most describe Toyota's practices as case studies or stories Designed to aid in the implementation of Lean manufacturing The Modern Theory of the Toyota Production System

A Systems Inquiry of the World's Most Emulated and Profitable Management System explains that your organization already has what it takes to succeed with TPS and what's probably missing is balance. Bridging the gap between implementation and theory, this text is the first of its kind to use systems theory to study how the pieces of the Toyota Production System (TPS) work together to achieve this much-needed balance. Lean practitioners will learn how to use system theory to improve overall decision making when applying Lean or Toyota-like management systems. Explaining that the glue that holds the pieces of TPS together is just as important as the pieces themselves, the book provides you with invaluable guidance in the implementation of Lean manufacturing from a management perspective. It outlines a blueprint to help you develop a clear understanding of how the pieces of TPS need to come together so you can achieve something greater than what's possible with the individual pieces.

**Military Supply Chain Management and People's Liberation Army Logistics** Rajiv Chauhan, 2015-01-01 Military logistics is a relatively new word to describe a very old practice: the supply movement and maintenance of an armed force both in peace time and under operational conditions. Logistic considerations are generally built into battle plans at an early stage. Without logistics, tanks, armored personnel carriers, artillery pieces, aircraft are just numbers on a table of organization and equipment. Through this book, an endeavor has been made to understand the logistics of People's Liberation Army (PLA) of China. An introduction to the theory of supply chain management and logistics of foreign Armies is discussed. Today, Revolution in Military Logistics (RML) is taking place in the People's Liberation Army. An attempt has been made to study this evolution, development, and rapid modernization of the People's Liberation Army logistics.
