Raikhel University of Chicago Over the last decade anthropologists have increasingly come to study the role of morality in shaping the course of social life Within anthropological debates around morality Zigon has been developing one of the most creative and challenging positions In this book he pushes his project to a whole new level working it out carefully through an important ethnographic case Those interested in morality in any field will want to read this striking exemplification of the way an anthropology of morality can help us think about social life in new ways Joel Robbins University of California San Diego

Misconceiving Mothers Laura E. Gómez, 1997 A tiny African American baby lies in a hospital incubator tubes protruding from his nostrils head and limbs He couldn't take the hit the caption warns If you're pregnant don't take drugs Ten years earlier this billboard would have been largely unintelligible to many of us But when it appeared in 1991 it immediately conjured up several powerful images the helpless infant himself his unseen environment a newborn intensive care unit filled with babies crying inconsolably and the mother who did this crack addicted and unrepentant Misconceiving Mothers is a case study of how public policy about reproduction and crime is made Laura E. Gómez uses secondary research and first hand interviews with legislators and prosecutors to examine attitudes toward the criminalization and or medicalization of drug use during pregnancy by the legislature and criminal justice system in California She traces how an initial tendency toward criminalization gave way to a trend toward seeing the problem of crack babies as an issue of social welfare and public health It is no surprise that in an atmosphere of mother blaming particularly targeted at poor women and women of color crack babies so easily captured the American popular imagination in the late 1980s What is surprising is the way prenatal drug exposure came to be institutionalized in the state apparatus Gómez attributes this circumstance to four interrelated causes the gendered nature of the social problem the recasting of the problem as fundamentally medical rather than criminal the dynamic nature of the process of institutionalization and the specific features of the legal institutions that is the legislature and prosecutors offices that became prominent in the case At one level Misconceiving Mothers tells the story of a particular problem at a particular time and place how the California legislature and district attorneys grappled with pregnant women's drug use in the late 1980s and early 1990s At another level the book tells a more general story about the political nature of contemporary social problems The story it tells is political not just because it deals with the character of political institutions but because the process itself and the nature of the claims making concern the power to control the allocation of state resources A number of studies have looked at how the initial criminalization of social problems takes place Misconceiving Mothers looks at the process by which a criminalized social problem is institutionalized through the attitudes and policies of elite decision makers Author note Laura E. Gómez is Acting Professor of Law and Sociology University of California Los Angeles

Qualitative Methods in Drug Abuse and HIV Research Elizabeth Y. Lambert, 1995 **NIDA Research Monograph**, 1976 On Addiction Darin Weinberg, 2024-08-23 Mainstream addiction science sees addiction either as a biomedical disease that renders one incapable of self control or as a voluntary practice engaged in freely In On

Addiction Darin Weinberg shows how this dynamic is deeply influenced by a series of binaries free will determinism mind body objectivity subjectivity that hinder our understanding of addiction Here he offers a new theorization of addiction in which he breaks down these contradictions and incompatibilities calling into question the taken for granted distinction between the biological and the social To the extent that it is understood as a loss of self control over one s behavior addiction Weinberg contends requires a supple theoretical framework that provides for movements into and out of self control for the social and natural processes that influence these movements for the historical contexts within which they occur and for the ethical ramifications of taking them seriously To create this framework Weinberg brings together history ethnography and critical theory as well as the clinical and social sciences In this way Weinberg takes a more holistic approach to examining the fundamental nature and ethics of addiction
