Honesty Robert Yugovich,2012-05-10 It turned out that Robert Yugovich had to leave the gang of which he was a key part for many years He was aware of the gravity of his actions and knew that the gang would not sit idly by and overlook the fact that he had broken the unwritten rules of the mafia He had two choices killing his boss his only friend still alive or fleeing with his family Trusting the laws of the European Union the orderliness of democracy and the respect of human rights and dignity under a false name he sought refuge in one of the member states of the European Union with support from the witness protection program He soon realized that what lied ahead of him was not what he had expected It was doubly true for Hungary anything could happen Robert realized that not only the Serb mafia but the biased unfair national justice system was after his skin Neither the former nor the latter would refrain from hurting him without a second thought for his family He had no other choice but to survive whatever may come and keep fighting even if the face of hope slowly ebbed away He didnt believe in miracles but the real loser was the one that did not even try to win The fight for survival dignity and justice still continues to this day The reason he decided to write this book was to help others learn from his mistakes The other reason was personal He wanted to put reality on paper because it was disgusting how neither the truth nor reality was needed to judge or to condemn someone Just as there were good cops there were good criminals too and there were brutal people in the establishment as well Truth is always where the power is      *Urban Housing Patterns in a Tide of Change* Tom Kauko,2006 The development of the housing markets in different European metropolitan areas is of high interest for the urban development and the real estate markets which are moving towards globalisation The Budapest housing market is an ideal candidate for scrutiny from an institutional and evolutionary perspective due to its fragmented nature different house types age categories price levels and micro locations are found side by side This is a case in between Eastern and Western settings with its own distinctive path dependence its development pattern does not resemble any other system The study comprises an innovative economic analysis of the Budapest housing market structure Applying the self organising map and the learning vector quantification sheds light on how physical and socio demographic characteristics price and regulation are related in this market      **Werewolves** Linda S.
