## **Strength And Weakness At The Interface Positional Neutralization In Phonetics And:**

**Strength and Weakness at the Interface** Jonathan Barnes, 2006 Biographical note Jonathan Barnes is Assistant Professor at Boston University Massachusetts USA *Strength and Weakness at the Interface* Jonathan Barnes, 2008-08-22 This thorough study of the expression of contrast in the world's vowel systems examines phonetic and phonological differences between so-called strong and weak positions bringing the full range of data from positional neutralization systems to bear on central questions at the interface between phonetics and phonology The author draws evidence from a diverse array of sources bringing together cross-linguistic typological surveys detailed investigations of the diachrony of specific languages Slavic Turkic Uralic Austronesian among many others and original studies in experimental phonetics Devoted at once to empirical coverage and to theoretical investigation this is the first work to compile so exhaustive a study of positional neutralization patterns in the languages of the world On the basis of this catalog of evidence the author argues for a diachronically oriented approach to the phonetic motivations behind phonological patterns with phonologization as its central mechanism Three pairs of traditionally identified strong and weak positions for the realization of vowel contrasts are selected and examined in detail stressed and unstressed syllables domain final and non-final syllables and domain initial and non-initial syllables Neutralization patterns in each position are extracted from survey data and analyzed in light of the phonetic characteristics of each pair of positions Both the nature of the patterns identified as well as the variety and sources of exceptions have important consequences for formal phonology phonetics and historical linguistics as well

Neutralization Daniel Doron Silverman, 2012-08-16 Provides in depth nuanced and critical analyses of many theoretical approaches to neutralization in phonology and argues for a strictly functional characterization of the term The book includes a glossary discussion points and lists of further reading to help advanced phonology students consolidate the main ideas and findings on neutralization Romance Phonetics and Phonology Mark Gibson, Juana Gil Fernández, 2019 This book explores recurring topics in Romance phonetics and phonology Topics studied range from the low-level mechanical processes involved in speech production and perception to high-level representation and computation based on data from across the Romance language family including from varieties that are less widely studied *Approaches to Metaphony in the Languages of Italy* Francesc Torres-Tamarit, Kathrin Linke, Marc van Oostendorp, 2016-06-06 This volume presents current work on a topic in Romance linguistics that still informs linguistic theory to this day metaphony in the languages of Italy Papers discuss fundamental research topics such as phonological opacity in the light of chain shifts post-tonic harmony and consonant transparency the role of morphosyntax in the typology of metaphony the explanatory adequacy of feature-based versus element-based analyses and the locus of metaphony in grammar Other chapters present new experimental data thus building a more accurate empirical foundation for the study of metaphony We envision the volume to become a reference book not only for an updated descriptive survey of metaphonic patterns in Italy but also a thorough discussion of the challenges that

metaphony poses for different morpho phonological theories The book bridges the gap between descriptive works and theoretical thinking in the study of metaphony

**Interfaces of Phonetics** Marcel Schlechtweg, 2024-03-18 The role of phonetic detail within the language system and its interplay with other kinds of linguistic information represent a hotly debated territory In the current volume different types of phonetic nuances are examined with a particular focus on their relation to phonological morphological and semantic pragmatic phenomena These three interfaces the phonetic phonological the phonetic morphological and the phonetic semantic pragmatic one are investigated from a variety of angles and by consistently taking the rapport between phonetics and phonology into consideration In doing so we provide an up to date picture of research dealing with the interaction of distinct linguistic areas and also discuss the question if and when phonology is needed to mediate between phonetics and other linguistic domains

**Prosody and Prosodic Interfaces** Haruo Kubozono, Junko Ito, Armin Mester, 2022 This volume brings together new work on prosody and prosodic interfaces from international experts in the field with parts exploring word prosody and phrase prosody lexical tone and intonation and the syntax prosody interface The empirical data comes from a wide range of languages including many that are largely undocumented or understudied

*Information Structure and Agreement* María Victoria Camacho Taboada, Ángel Jiménez-Fernández, Javier Martín-González, Mariano Reyes-Tejedor, 2013-01-01 Consists of thirteen contributions that focuses on the trends of information structure and agreement couched in the present developments of Minimalism Cartography and Optimality In this book chapters deal with notion of agreement and its role in syntax of specific constructions such as applicatives and correlatives

**Manual of Romance Phonetics and Phonology** Christoph Gabriel, Randall Gess, Trudel Meisenburg, 2021-11-22 This handbook is structured in two parts it provides on the one hand a comprehensive synchronic overview of the phonetics and phonology including prosody of a breadth of Romance languages and focuses on the other hand on central topics of research in Romance segmental and suprasegmental phonology including comparative and diachronic perspectives Phonetics and phonology have always been a core discipline in Romance linguistics the wide synchronic variety of languages and dialects derived from spoken Latin is extensively explored in numerous corpus and atlas projects and for quite a few of these varieties there is also more or less ample documentation of at least some of their diachronic stages This rich empirical database offers excellent testing grounds for different theoretical approaches and allows for substantial insights into phonological structuring as well as into incipient ongoing or concluded processes of phonological change The volume can be read both as a state of the art report of research in the field and as a manual of Romance languages with special emphasis on the key topics of phonetics and phonology

**Linguistic Studies on Biblical Hebrew**, 2021-03-08 This volume presents the research insights of twelve new studies by fourteen linguists examining a range of Biblical Hebrew grammatical phenomena The contributions proceed from the second international workshop of the Biblical Hebrew Linguistics and Philology network [www.BHLaP.wordpress.com](http://www.BHLaP.wordpress.com) initiated in 2017 to bring together theoretical

linguists and Hebraists in order to reinvigorate the study of Biblical Hebrew grammar Recent linguistic theory is applied to the study of the ancient language and results in innovative insight into pausal forms prosodic dependency ordinal numeral syntax ellipsis the infinitive system light verbs secondary predicates verbal semantics of the Hiphil binyan and hybrid constructions      *Locality in Vowel Harmony* Andrew Nevins, 2010 This work offers phonologists new evidence that viewing vowel harmony through the lens of relativized minimality has the potential to unify different levels of linguistic representation and different domains of empirical inquiry in a unified framework      *Introduction to Element Theory* Phillip Backley, 2011-07-07 A fresh alternative for describing segmental structure in phonology      **Proceedings of the**

**International Conference of Public Administration and Governance (ICoPAG 2022)** Firda Hidayati, Niken Lastiti Veri Anggaini, Fadillah Putra, Muhammad Chazienul Ulum, 2023-07-25 This is an open access book The role of administrative science in the management of public sector organizations and the business sector is crucial Accordingly it must be able to create science based contributions in the disruption time caused by the current pandemic Since a lot of challenges arise in administrative science due to this pandemic such as physical restrictions digitization of services and also loss of economic resources need some change and adaptation in the practise of public administration Various important discussions and research in public administration on pandemics have achieved many things starting from the impact of the pandemic in various sectors organizational adaptation strategies policy implementation and evaluation policy best practices for resilience but among that good work much is still needed One of them is public discussion forums that are able to provide inspiration and solutions to various problems in this new normal era Therefore the Master of Public Administration program organize an international seminars and conferences entitled Globalization and the Challenges of Public Administration in the Post Covid 19 amid intense geopolitical competition The whole series of virtual international seminar and conference is open to students lecturers researchers policy makers and practitioners who are interested in issues related to Administrative Science to share their work and ideas Participants will present their paper work in English Non presenting participants are allowed to choose discussion groups according to their respective interests and thus the seminar will be a good opportunity to receive feedback for the presented papers and stay informed about trends and research agendas in the field      *Linguistic Universals and Language Change* Jeff Good, 2008-01-25 This book looks at the relationship between linguistic universals and language change Reflecting the resurgence of work in both fields over the last two decades it addresses two related issues of central importance in linguistics the balance between synchronic and diachronic factors in accounting for universals of linguistic structure and the means of distinguishing genuine aspects of a universal human cognitive capacity for language from regularities that may be traced to extraneous origins The volume brings together specially commissioned work by leading scholars including prominent representatives of generative and functional linguistics It examines rival explanations for linguistic universals and assesses the effectiveness of competing models of language change The authors investigate patterns

and processes of grammatical and lexical change across a wide range of languages they consider the degree to which common characteristics condition processes of change in related languages and examine how far differences in linguistic outcomes may be explained by cultural or external factors This book will interest the wide range of scholars in linguistics and related fields concerned with language change historical linguistics linguistic typology and universals and the nature of the human language faculty

**Phonetic Causes of Sound Change** Daniel Recasens, 2020-08-13 This book provides an integrated account of the phonetic causes of the diachronic processes of palatalization and assibilation of velar and labial stops and labiodental fricatives as well as the palatalization and affrication of dentoalveolar stops While previous studies have been concerned with the typology of sound inventories and of the processes of palatalization and assibilation this volume not only deals with the typological patterns but also outlines the articulatory and acoustic causes of these sound changes In his articulation based account Daniel Recasens argues that the affricate and fricative outcomes of these changes developed via an intermediate stage namely an alveolo palatal stop with varying degrees of closure fronting Particular emphasis is placed on the one to many relationship between the input and output consonant realizations on the acoustic cues that contribute to the implementation of these sound changes and on the contextual positional and prosodic conditions that most favour their development The analysis is based on extensive data from a wide range of language families including Romance Bantu Slavic and Germanic and draws on a variety of sources such as linguistic atlases articulatory and acoustic studies and phoneme identification tests
