of reference in all discussion on the Second World War The second edition of this distinguished collection written by leading experts in the field is designed to bring the state of the argument up to date The issues discussed include the legacy of the Treaty of Versailles Hitlers foreign policy Appeasement AJP Taylor and the Russians the treatment of the crises leading up to war including the Anschluss Danzig Abyssinian crises and the Spanish Civil War This second edition will ensure that The Origins of the Second World War will remain a high priority student and scholarly reading lists German Diplomatic Relations 1871-1945 William Young, 2006 Examines the continuity of German Foreign Office influence in the formulation of foreign policy under the leadership of Otto von Bismarck 1862 1890 Kaiser William II 1888 1918 the Weimar Republic 1919 1933 and Adolf Hitler 1933 1945 **Nato and Germany: a Study in the Sociology of Supernational Relations (c)** Stanford M. Lyman, 1995 Focusing on the Cold War years this monograph examines the processes problems and policies through which the Federal Republic of Germany was formed and admitted into the North Atlantic Treaty Organization NATO The author compares the situation of Weimar Germany during its short lived postwar decade with that of the Federal Republic by applying geopolitical concepts and theory illustrating Germany s territorial uniqueness and how that special aspect of its place on the European continent influenced the nation s diplomacy in both eras **Soviet Disarmament Policy, 1922-1931** Robert W. Lambert, 1964 The study is a historical analysis of Soviet disarmament policy from 1922 when Moscow first began to show serious interest in disarmament to 1931 when arrangements for the Disarmament Conference were completed In order to present the subject in the historical context of the period certain information was included on other aspects of Soviet foreign policy domestic developments in the USSR and the attitudes of other major powers toward disarmament security and related problems Soviet policy is summarized and the author s conclusions are set forth at the end of the narrative Texts of key Soviet papers and a bibliography are included The Civil-Military Fabric of Weimar Foreign Policy Gaines Post, Jr., 2015-03-08 In the historiographic debate over Germany s responsibility for the outbreak of the two world wars little attention has been paid to German politico military activity in the Weimar Republic Although Weimar diplomats and military leaders emphasized the interconnection and developed ideas and procedures for joint planning historians have usually treated the foreign and military affairs of the republic separately Gaines Post Jr however examines the relationship between foreign policy and military planning and charts its directions and changes to develop a model of German civil military relations which sheds light on the general problem of modern civil military relations He shows that diplomats and military leaders shared assumptions about the role of force in foreign policy and the subordination of the military arm to the political leadership and that they collaborated in assessing Germany s strategic situation in rearmament and in operational exercises In the 1920 s interdepartmental cooperation between the foreign office and the Defense Ministry became the foundation of a stable system of civil military relations The system broke down during the crisis period of 1930 1933 because of mounting institutional pressures The author demonstrates how in both periods civilian and military leaders

viewed military force not simply as an instrument of national self defense but as an acceptable means of attaining national goals above all the revision of the German Polish borders Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *The 20th Century O-Z* Frank N. several twentieth century cases including World War I World War II and the Cold War He highlights instigating factors that transcend individual personalities styles of government geography and historical context to reveal remarkable consistency across several major wars usually considered dissimilar The result is a series of challenges to established interpretive positions and provocative new readings of the causes of conflict Classical realists and neorealists claim that dominant powers initiate war Hegemonic stability realists believe that wars are most often started by rising states Copeland offers an approach stronger in explanatory power and predictive capacity than these three brands of realism he examines not only the power resources but the shifting power differentials of states He specifies more precisely the conditions under which state decline leads to conflict drawing empirical support from the critical cases of the twentieth century as well as major wars spanning from ancient Greece to the Napoleonic Wars **Stresemann and the Rearmament of Germany** Liz Ann Sanders,1970*
