**The Social Ecology of Resilience** Michael Ungar, 2011-10-08 More than two decades after Michael Rutter 1987 published his summary of protective processes associated with resilience researchers continue to report definitional ambiguity in how to define and operationalize positive development under adversity The problem has been partially the result of a dominant view of resilience as something individuals have rather than as a process that families schools communities

and governments facilitate Because resilience is related to the presence of social risk factors there is a need for an ecological interpretation of the construct that acknowledges the importance of people s interactions with their environments The Social Ecology of Resilience provides evidence for this ecological understanding of resilience in ways that help to resolve both definition and measurement problems Stress, Coping, and Health in Families Hamilton I. triumph devastating loss and ultimate redemption the voices of these family members add a new dimension to debates about capital punishment and how communities can prevent and address crime Restorative justice theory which views violent crime as an extreme violation of relationships searches for ways to hold offenders accountable and meets the needs of victims and communities torn apart by the crime organizes these narratives and integrates offenders families into the process of transforming conflict and promoting justice and healing for all What emerges from hundreds of hours worth of in depth interviews with family members of offenders and victims legal teams and leaders in the abolition and restorative justice movements is a vision of justice strongly rooted in the social fabric of communities Showing that forgiveness and recovery are possible in the wake of even the most heinous crimes while holding victims stories sacred this eye opening book bridges the pain of living in the shadow of death with the possibility of a reparative form of justice Anyone working with victims offenders and their families from lawyers and social workers to mediators and activists will find this riveting work indispensable to their efforts
