

# STRESS MANAGEMENT

## *For Healthcare Workers*

*Jobs are the leading cause of stress in adults' lives, and research shows that employees in the healthcare industry are the most stressed of all.\* If you are a healthcare worker, here are some ways you can reduce stress levels at work.*

### 1 TRACK YOUR TRIGGERS

The first step is identifying where your stressors come from. Is it a certain situation, a particular coworker, or a patient behavior? Keeping track your stressors can help you recognize patterns and avoid a stress response altogether.

### 2 USE TALK THERAPY

Sometimes, talking things out and venting a little can help with stress tremendously. Whether you're talking to a coworker or even a hospital chaplain or therapist, taking a minute to get something off your chest and let yourself be comforted can be beneficial.

### 3 TAKE A BREAK

When you're extremely stressed at work, you may do or say things you normally wouldn't due to your frustration. It's important to take a moment to remove yourself from the situation (if you can), be alone, and take a breather to recharge.

### 4 FOCUS ON THE POSITIVE

It's been proven that the way you think influences how you feel overall. Engaging in positive and constructive self-talk and trying to keep an optimistic outlook is a step in the right direction to reducing stress.

### 5 TAKE CARE OF YOURSELF

Your overall health and physical condition can really influence how well you manage stress. Exercise, a balanced diet, and getting enough sleep can aid in improving your physical and mental health. Take time for activities outside of work to promote a healthy work-life balance.
