*The Origins of Creativity* Edward O. Wilson, 2017-10-03 Brimming with ideas *The Origins of Creativity* approaches creativity scientifically but sensitively feeling its roots without pulling them out Economist In a stirring exploration of human nature recalling his foundational work *Consilience* Edward O. Wilson offers a luminous Kirkus Reviews reflection on the humanities and their integral relationship to science Both endeavors Wilson argues have their roots in human creativity the defining trait of our species By studying fields as diverse as paleontology evolution and neurobiology Wilson demonstrates that creative expression began not 10 000 years ago as we have long assumed but more than 100 000 years ago in the Paleolithic Age A provocative investigation into what it means to be human *The Origins of Creativity* reveals how the humanities have played an unexamined role in defining our species With the eloquence optimism and pioneering inquiry we have come to expect from our leading biologist Wilson proposes a transformational Third Enlightenment in which the blending of science and humanities will enable a deeper understanding of our human condition and how it ultimately originated

*From Biped to Strider* D. Jeffrey Meldrum, Charles E. Hilton, 2011-06-27 The inspiration for this volume of contributed papers stemmed from conversations between the editors in front of Chuck Hilton's poster on the determinants of hominid walking speed presented at the 1998 meetings of the American Association of Physical Anthropologists AAPA Earlier at those meetings Jeff Meldrum with Roshna Wunderlich had presented an alternate interpretation of the Laetoli footprints based on evidence of midfoot flexibility As the discussion ensued we found convergence on a number of ideas about the nature of the evolution of modern human walking From the continuation of that dialogue grew the proposal for a symposium which we called *From Biped to Strider: The Emergence of Modern Human Walking* The symposium was held as a session of the 69th annual meeting of the AAPA held in San Antonio Texas in 2000 It seemed to us that the study of human bipedalism had become overshadowed by the often polarized debates over whether australopithecines were wholly terrestrial in habit or retained a significant degree of arboreality

*Strider* Beverly Cleary, 2001-01-01 Strider has a new habit Whenever we stop he places his paw on my foot It isn't an accident because he always does it I like to think he doesn't want to leave me Can a stray dog change the life of a teenage boy It looks as if Strider can He's a dog that loves to run because of Strider Leigh Botts finds himself running well enough to join the school track team Strider changes Leigh on the inside too as he finally begins to accept his parents' divorce and gets to know a redheaded girl he's been admiring With Strider's help Leigh finds that the future he once hated to be asked about now holds something he never expected hope

*Scanning and Sizing the Universe and Everything in It* Harold Toliver, 2023-02-03 One of the faults in philosophy generally even the philosophy of science is ignoring the extended scale of the natural continuum and putting in its place something Anthropomorphic This book suggests a means of keeping score that puts common situations places topography and even home ground in the context of that continuum the whole of atomic matter and its history As shown here the discrepancy between normal measurements and what actually exists is similar to that between yardsticks and light years
