Terrorism Threat Brecht Volders,2021-07-08 This book examines the threat of a terrorist organisation constructing and detonating a nuclear bomb It explores the role and impact of the organisational design of a terrorist organisation in implementing a nuclear terrorism plot In order to do so the work builds on the organisational analogy between an assumed nuclear terrorism scenario and four case studies as follows the construction of the first atomic bombs at Los Alamos South Africa s Peaceful Nuclear Explosives PNE program Aum Shinrikyo s chemical biological armament activities and Al Qaeda s implementation of the 9 11 attacks Extrapolating insights from these case studies this book introduces the idea of an effectiveness efficiency trade off On the one hand it will be argued that a more organic organisational design is likely to benefit the effective implementation of a nuclear terrorism project On the other hand this type of organic organisational design is also likely to simultaneously constitute an inefficient way for a terrorist organisation to guarantee its operational and organisational security It follows then that the implementation of a nuclear terrorism plot via an organic organisational design is also likely to be an inefficient strategy for a terrorist organisation to achieve its strategic and political goals This idea of an effectiveness efficiency trade off provides us with a tool to strengthen the comprehensive nature of future nuclear terrorism threat assessments and sheds new light on the ongoing debates within the nuclear terrorism literature This book will be of particular interest to students of nuclear proliferation terrorism studies international organisations and security studies in general   The War on Terror and the Normalisation of Urban Security Jon Coaffee,2021-11-07 This book explores the processes by which in the 20 years after 9 11 the practices of urban security and counter terrorism have impacted the everyday experiences of the Western city Highlighting the localised urban responses to new security challenges it reflects critically upon the historical trajectory of techniques of territorialisation and physical protection urban surveillance and the increasing need for cities to enhance resilience and prepare for anticipated future attacks and unpacks the practices and impacts of the intensification of recent urban security practices in the name of countering terrorism Drawing on over 25 years of research and practical experience the author utilises a range of international case studies framed by conceptual ideas drawn from critical security political and geographical theory The book will be of interest to students and scholars of politics war studies urban studies geography sociology criminology and the growing market of security and resilience professionals as well as non academic audiences seeking to understand responses to terrorist risk   Target Markets – International Terrorism Meets Global Capitalism in the Mall Suzi Mirgani,2017-03-15 This book explores the points of convergence between corporate capitalist and terrorist practice Assessing an increase in the number of terrorist attacks directed at commercial entities in urban areas with an emphasis on the shopping mall in general and Nairobi s Westgate Mall in particular Suzi Mirgani offers a fascinating and disturbing perspective on the spaces where the most powerful forces of contemporary culture the most mainstream and the most extreme meet on common ground   **Fresh Perspectives on the 'War on Terror'** Miriam Gani,Penelope Mathew,2008-07-01 On 20 September 2001 in an address to a Joint Session of
