**Normalisation of Exceptional Counterterrorism Powers** Marine Guéguin, 2025-06-30 This book investigates the framing of the terrorist threat in France from 2015 to 2020 as an exceptional challenge which requires a special public security response. The book examines how French political actors framed the terrorist threat in French political discourse from an exceptional challenge to a permanent routine threat. It provides an in-depth critical discourse analysis of the French political narratives surrounding the activation of the *tat d'urgence* state of emergency following the 2015 Charlie Hebdo and Paris terrorist attacks and traces this narrative until 2020. The study explores the securitisation/desecuritisation framework showing how the normalisation of emergency powers reflects the ongoing re-construction of terrorism within French political contexts. The work demonstrates the importance of threat framing and the securitisation of terrorism by considering the colonial legacies embedded in French counterterrorism (CT) policies. By investigating the intersection of CT political discourse, temporality and colonial continuity, the book challenges traditional notions of exceptionalism in securitisation. It argues that the routinisation of counterterrorism measures highlights the impossibility of fully desecuritisating terrorism, re-establishing the status quo, revealing how these measures are deeply rooted in France's colonial past. This book will be of interest to students of Terrorism Studies, Critical Security Studies, French politics and International Relations. **The Tabloid**

**Conflict Studies** Ioannis Tellidis, Harmonie Toros, 2015-02-11 This book examines potential synergies between the fields of Terrorism Studies and Peace and Conflict Studies. The volume presents theoretically and empirically informed contributions which shed light on whether the two fields can inform each other on issues of mutual interest and importance. The book examines key themes including the conceptualisations of peace and violence, the exceptionalisation of terrorist violence, the relationship between scholarship and political power, the dysfunctionality of the liberal peace and the opportunities offered by post-liberal peacebuilding frameworks and the implications and challenges of cyber terrorism and cyber conflict. Furthermore, the book intends to be a launching pad for future debate on whether the recent critical turn in terrorism studies can offer a pathway for peace studies to engage with the so far largely ignored question of power. Consisting of not only key scholars but also practitioners and policy makers, the contributors present a number of case studies including Colombia, Northern Ireland, the Basque Country and Iraq where they explore the relationships between terrorism and peace and conflict approaches. They critically analyse the statist approach inherent in both terrorism approaches and liberal peacebuilding frameworks, the role of the grassroots levels of society, the inefficiency of simplistic frameworks of understanding and implementation and the chains of governance from international and transnational actors to national actors and finally from national to local actors. This book will be of much interest to students of terrorism studies, peace and

Dos Santos, 2007-10-30 From Chechnya in Russia to Kashmir in India to the Basque region in Spain secessionist movements remain a serious threat to international security Despite the importance of this issue the causes that bring about external military intervention in a secessionist war have not until now been adequately addressed In this book Dos Santos identifies the conditions that make international military intervention in a secessionist war more or less likely South Asia being fraught with secessionist movements Bangladesh Sri Lanka Kashmir and Punjab provides an ideal laboratory for the examination of this compelling issue Dos Santos argues that a shift in the balance of power between a secessionist group and its central government will lead to a preventive war on the secessionists by the central government In turn a preventive war of this nature may lead to an alliance between the secessionist group and an external power The stronger the alliance the greater

the chances of an international military intervention Understanding the conditions under which secessionist movements expand become secessionist wars and invite international military intervention on behalf of the secessionists has strong policy implications It can go a long way toward guiding policymakers who may want to mitigate or avoid these conditions in their states Dos Santos views both states and secessionist groups as primary actors and she examines both the distribution of power among states and the balance of power between central government and groups within states     *Counter-terrorism and the Detention of Suspected Terrorists* Claire Macken,2013-03 This book analyses the preventative confinement of suspected terrorists with regard to different models of counter terrorism policy within the context of international human rights law The book is written from a global perspective drawing on cases and practice from different jurisdictions including the US the UK and Australia     **Paperbound Books in Print 1995** Reed Reference Publishing,R5ference Reed,1995-12
