**Terrorism and the News Media** A. Odasuo Alali, Gary W. Byrd, 1994 Terrorism and the news media share a symbiotic relationship both command attention deliver a message and shape opinion Current research indicates that terrorist incidents are among the most often used lead in stories on television s evening news The focus here is on how the news media cover terrorism in their reporting Over 600 entries are divided into three areas understanding terrorism terrorism in the electronic media and terrorism in the print media The Invention of Terrorism in Europe, Russia, and the United States Carola Dietze, 2021-07-20 Terrorism s roots in Western Europe and the USA This book examines key cases of terrorist violence to show that the invention of terrorism was linked to the birth of modernity in Europe Russia and the United States rather than to Tsarist despotism in 19th century Russia or to Islam sects in Medieval Persia Combining a highly readable historical narrative with analysis of larger issues in social and political history the author argues that the dissemination of news about terrorist violence was at the core of a strategy that aimed for political impact on rulers as well as the general public Dietze s lucid account also reveals how the spread of knowledge about terrorist acts was from the outset a transatlantic process Two incidents form the book s centerpiece The first is the failed attempt to assassinate French Emperor Napol on III by Felice Orsini in 1858 in an act intended to achieve Italian unity and democracy The second case study offers a new reading of John Brown s raid on the arsenal at Harpers Ferry in 1859 as a decisive moment in the abolitionist struggle and occurrences leading to the American Civil War Three further examples from Germany Russia and the US are scrutinized to trace the development of the tactic by first imitators With their acts of violence the invention of terrorism was completed Terrorism has existed as a tactic since then and has essentially only been adapted through the use of new technologies and methods

Roberts, 2013-10-28 Politicians and bureaucrats claim credit for the federal government s successes in preparing for and responding to disaster and they are also blamed for failures outside of government s control New interventions have created precedents and established organizations and administrative cultures that accumulated over time and produced a trend in which citizens politicians and bureaucrats expect the government to provide more security from more kinds of disasters Despite the rhetoric however the federal government s increasingly bold claims and heightened public expectations are disproportionate to the ability of the federal government to prevent or reduce the damage caused by disaster      *Resources in Education* , 1997
