*Testing Aircraft, Exploring Space* Roger E. Bilstein, 2003 Selected by Choice Magazine as an Outstanding Academic Title for 2003 The National Advisory Committee for Aeronautics forerunner of today's NASA emerged in 1915 when airplanes were curiosities made of wood and canvas and held together with yards of baling wire At the time an unusual example of government intrusion and foresight given the importance of aviation to national military concerns the committee oversaw the development of wind tunnels metal fabrication propeller design and powerful new high speed aircraft during the 1920s and 30s In this richly illustrated account acclaimed historian of aviation Roger E Bilstein combines the story of NACA and NASA to provide a fresh look at the agencies the problems they faced and the hard work as well as inventive genius of the men and women who found the solutions NACA research during World War II led to critical advances in U S fighter and bomber design and Bilstein explains contributed to engineering standards for helicopters After 1945 the agency's test pilots experimented with jet powered aircraft testing both human and technical limits in trying to break the so called sound barrier In October 1958 when the launch of the Soviet Sputnik signaled the beginning of the space race NACA formed the nucleus of the new National Aeronautics and Space Agency The new agency's efforts to meet President Kennedy's challenge safely landing a man on the Moon and returning him to Earth before the end of the 1960s is one of the great adventure stories of all time Bilstein goes on to describe NASA's recent planetary and extraplanetary exploration as well as its less well known research into the future of aeronautical design

Research in NASA History Steven J. Dick, 2009 As the National Aeronautics and Space Administration NASA celebrated its 50th anniversary in 2008 historians as well as scientists and engineers could look back on a record of accomplishment Much has been written about the evolution of NASA's multifaceted programs and the people who carried them out Yet much remains to be done and we hope this publication will facilitate research in this important field Page 1

Commerce in Space: Infrastructures, Technologies, and Applications Olla, Phillip,2007-07-31 This book explains the role of earth observation satellite initiatives to meet information needs It details the importance of the space infrastructure to deliver IT capabilities such as mobile broadband Internet and mobile communication connectivity it also offers a review of how space technology can influence the future of IT architecture in health education logistics business and accounting

Provided by publisher The "Apollo" of Aeronautics Mark D. Bowles,2010 The book covers the Aircraft Energy Efficiency ACEE consisting of six aeronautical projects born out of the energy crisis of the 1970s and divided between the Lewis and Langley Research Centers in Ohio and Virginia Abandoned in Place Roland Miller,2016-03-01

Stenciled on many of the deactivated facilities at Cape Canaveral Air Force Station the evocative phrase abandoned in place indicates the structures that have been deserted Some structures too solid for any known method of demolition stand empty and unused in the wake of the early period of US space exploration Now Roland Miller s color photographs document the NASA Air Force and Army facilities across the nation that once played a crucial role in the space race Rapidly succumbing to the elements and demolition most of the blockhouses launch towers tunnels test stands and control rooms featured in Abandoned in Place are located at secure military or NASA facilities with little or no public access Some have been repurposed but over half of the facilities photographed no longer exist The haunting images collected here impart artistic insight while preserving an important period in history *Special Bibliography Series* ,1957 **Winged Crusade** ,2003 This bibliography lists a selected portion of the McDermott Cadet Library s holdings on the American experience of manned powered flight during the twentieth century Excluded are newspaper articles most pictorial works works dealing with lighter than air flight and studies of rotorcraft

**Remembering the Space Age** Steven J. Dick,2008 From the Publisher Proceedings of October 2007 conference sponsored by the NASA History Division and the National Air and Space Museum to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age Realizing the Dream of Flight

National Aeronautics and Space Administration,2005-12-31 These essays in celebration of the Wright brothers first flight 100 years ago grew out of presentations by a group of prominent scholars in 2003 at a conference sponsored by the NASA History Division and held at the Great Lakes Science Center in Cleveland Ohio The volume focuses on the careers of some of the many men and women who helped to realize the dream of flight both through the atmosphere and beyond These accounts are original and compelling because they examine the history of flight through the lens of biography *The Airplane in*

*American Culture* Dominick Pisano,2003 A fascinating account of America s relationship with the airplane *Modelling and Managing Airport Performance* Konstantinos Zografos,Giovanni Andreatta,Amedeo Odoni,2013-06-17 Modelling and

Managing Airport Performance provides an integrated view of state of the art research on measuring and improving the performance of airport systems with consideration of both airside and landside operations The considered facets of performance include capacity delays economic costs noise emissions and safety Several of the contributions also examine policies for managing congestion and allocating sparse capacity as well as for mitigating the externalities of noise emissions and safety risk Key features Provides a global perspective with contributing authors from Europe North and South America with backgrounds in academia research institutions government and industry Contributes to the definition interpretation and shared understanding of airport performance measures and related concepts Considers a broad range of measures that quantify operational and environmental performance as well as safety and risk Discusses concepts and strategies for dealing with the management of airport performance Presents state of the art modelling capabilities and identifies future modelling needs Themed around 3 sections Modelling Airport Performance Assessing Airport Impacts and Managing Airport Performance and Congestion Modelling and Managing Airport Performance is a valuable reference for researchers and practitioners in the global air transportation community

**The Development of Propulsion Technology for U.S. Space-launch Vehicles** J. D. Hunley,2007 In this definitive study J D Hunley traces the program s development from Goddard s early rockets and the German V 2 missile through the Titan IVA and the Space Shuttle with a focus on space launch vehicles Since these rockets often evolved from early missiles he pays considerable attention to missile technology not as an end in itself but as a contributor to launch vehicle technology Focusing especially on the engineering culture of the program Hunley communicates this very human side of technological development by means of anecdotes character sketches and case studies of problems faced by rocket engineers He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive but decidedly not rocket science Unique in its single volume coverage of the evolution of launch vehicle technology from 1926 to 1991 this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation as well as those specializing in the history of space flight

**Knowledge Management in the Space Industry** Phillip Olla,Jeanne Holm,2006 **NASA** Michael H. Gorn,2005 The first illustrated history of NASA the U S National Aeronautics and Space Administration ever to be published this groundbreaking book tells the exciting story of space exploration from the early twentieth century to the present focusing on the personalities involved as much as the technological advances that have made space exploration possible Authoritatively and accessibly written by historian Michael Gorn NASA The Complete Illustrated History tells of the climate of discovery that has existed inside the NASA and its precursor NACA Here Michael Gorn describes the tools and techniques of research and development such as wind tunnels and test flights in the atmosphere and discusses the temperaments and personal ambitions of scientists and engineers pilots and astronauts BOOK JACKET *Realizing the Dream of Flight* Virginia Parker Dawson,Mark D. Bowles,2005 **NASA** □□□□□□,2006-10-19 NASA 20 NASA NACA *U.S. Space-launch Vehicle*

*Technology* J. D. Hunley, 2008 For nearly fifty years a wide range of missiles and rockets has propelled U S satellites and spacecraft into the sky J D Hunley s two volume work traces the evolution of this technology from Robert Goddard s research in the 1920s through the development of the Titan missiles and launch vehicles in the 1960s to the refinement of the space shuttle in the 1980s With the first book devoted primarily to military hardware and the second to launch vehicle hardware Hunley offers a sweeping overview of these impressive engineering innovations as well as insights into the dynamic personalities responsible for them Together the two volumes offer a unique invaluable history of rocketry that should appeal to a wide range of scholars and space buffs

**Preludes to U.S. Space-launch Vehicle Technology** J. D. Hunley, 2008

Preludes to U S Space Launch Vehicle Technology is devoted primarily to military hardware and traces the evolution of missile technology from the 1920s through the 1970s when the Minuteman III became operational Hunley discusses individual innovations technology transfer management systems and the organizations that were involved in the research and development of a wide range of rockets and missiles including the German V 2 Redstone Atlas Thor Jupiter Titan I and II and Polaris He also humanizes the subject through numerous anecdotes and sketches of such fascinating individuals as Robert H Goddard Werner von Braun Bernard Schriever and Red Raborn among others
