Wineburg,2018-09-17 A look at how to teach history in the age of easily accessible but not always reliable information Let's start with two truths about our era that are so inescapable as to have become clichés We are surrounded by more readily available information than ever before And a huge percent of it is inaccurate Some of the bad info is well meaning but ignorant Some of it is deliberately deceptive All of it is pernicious With the Internet at our fingertips what's a teacher of history to do In Why Learn History When It's Already on Your Phone professor Sam Wineburg has the answers beginning with this We can't stick to the same old read the chapter answer the question snoozefest If we want to educate citizens who can separate fact from fake we have to equip them with new tools Historical thinking Wineburg shows has nothing to do with the ability to memorize facts Instead it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases Wineburg lays out a mine filled landscape but one that with care attention and awareness we can learn to navigate The future of the past may rest on our screens But its fate rests in our hands Praise for Why Learn History When It's Already on Your Phone If every K 12 teacher of history and social studies read just three chapters of this book Crazy for History Changing History One Classroom at a Time and Why Google Can't Save Us the ensuing transformation of our populace would save our democracy James W Lowen author of Lies My Teacher Told Me and Teaching What Really Happened A sobering and urgent report from the leading expert on how American history is taught in the nation's schools A bracing edifying and vital book Jill Lepore New Yorker staff writer and author of These Truths Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet and vice versa than any other scholar I know Anyone interested in the uses and abuses of history today has a duty to read this book Niall Ferguson senior fellow Hoover Institution and author of The Ascent of Money and Civilization

Baker, 2012-01-13 The science and practice of psychology has evolved around the world on different trajectories and timelines yet with a convergence on the recognition of the need for a human science that can confront the challenges facing the world today Few would argue that the standard narrative of the history of psychology has emphasized European and American traditions over others but in today's global culture there is a greater need in psychology for international understanding This volume describes the historical development of psychology in countries throughout the world Contributors provide narratives that examine the political and socioeconomic forces that have shaped their nations' psychologies Each unique story adds another element to our understanding of the history of psychology The chapters in this volume remind us that there are unique contexts and circumstances that influence the ways in which the science and practice of psychology are assimilated into our daily lives Making these contexts and circumstances
