Babies everywhere seem to smile when tasting sweetness for the first time, a trait inherited perhaps from our ancestors who foraged for sweet foods that were generally safer to eat than their bitter counterparts. But the science of sweet is only the beginning of a fascinating story because it is not basic human need or simple biological impulse that prompts us to decorate elaborate wedding cakes, scoop ice cream into a cone, or drop sugar cubes into coffee. These are matters of culture and aesthetics of history and society, and we might ask many other questions: Why do sweets feature so prominently in children's literature? When was sugar called a spice? And how did chocolate evolve from an ancient drink to a modern candy bar? *The Oxford Companion to Sugar and Sweets* explores these questions and more through the collective knowledge of 265 expert contributors from food historians to chemists, restaurateurs to cookbook writers, neuroscientists to pastry chefs. The Companion takes readers around the globe and throughout time, affording glimpses deep into the brain as well as stratospheric flights into the world of sugar-crafted

The ^AOxford Companion to American Food and Drink

Andrew F. Smith, 2007-05-01. Building on the highly praised and deliciously browseable two volume compendium, the Oxford Encyclopedia of Food and Drink in America, this new work serves up everything you could ever want to know about American consumables and their impact on popular culture and the culinary world. Within its pages, for example, we learn that Lifesavers candy owes its success to the canny marketing idea of placing the original flavor mint next to cash registers at bars. Patrons who bought them to mask the smell of alcohol on their breath before heading home soon found they were just as tasty sober, and the company began producing other flavors. Edited by Andrew Smith, a writer and lecturer on culinary history, the Companion serves up more than just trivia; however, including hundreds of entries on fast food, celebrity chefs, fish sandwiches, regional and ethnic cuisine, food science, and historical food traditions.
