The Great American Waistline Putting It On And Taking It Off:

Turning the Tables ,2011 Turning the Tables Ray & Joan Lisa Napoli,2016-11-15 The movie The Founder starring Michael Keaton focused the spotlight on Ray Kroc the man who amassed a fortune as the chairman of McDonald s But what about his wife Joan the woman who became famous for giving away his fortune Lisa Napoli tells the fascinating story behind the historic couple Ray Joan is a quintessentially American tale of corporate intrigue and private passion a struggling Mad Men era salesman with a vision for a fast food franchise that would become one of the world s most enduring brands and a beautiful woman willing to risk her marriage and her reputation to promote controversial causes that touched her deeply Ray Kroc was peddling franchises around the country for a fledgling hamburger stand in the 1950s McDonald s it was called when he entered a St Paul supper club and encountered a beautiful young piano player who would change his life forever The attraction between Ray and Joan was instantaneous and instantly problematic Yet even the fact that both were married to other people couldn t derail their roller coaster of a romance To the outside world Ray and Joan were happy enormously rich and giving But privately Joan was growing troubled over Ray s temper and dark secret something she was reluctant to publicly reveal Those close to them compared their relationship to that of Elizabeth Taylor and Richard Burton And yet this volatility paved the way for Joan s transformation into one of the greatest philanthropists of our time A force in the peace movement she produced activist films books and music and ultimately gave away billions of dollars including landmark gifts to the Salvation Army and NPR Together the two stories form a compelling portrait of the twentieth century a story of big business big love and big giving

American Boy, 1911. **America on Foot**, Kerry Segrave, 2006-03-15. Hippocrates, one of history's earliest known physicians, once asserted, "Walking is man's best medicine." Over the last three centuries, people have endorsed walking for a variety of reasons: health, among them. Before the 1700s, people walked as an essential part of their lifestyle. With the coming of the transportation revolution and the advent of such conveyances as horse-drawn coaches, railways, and automobiles, walking became something that was done increasingly out of choice rather than necessity. England's fashionable society engaged in afternoon promenades as a stylish fad. While America's vast distances and sparse settlements made this activity impractical, Americans nevertheless took to walking in other ways, including engaging in long-distance walking competitions complete with spectators and prize money. Thus, for most of the twentieth century, the activity of walking was much more than a means of transportation. Beginning with the history of walking as a social activity, the book discusses the various issues which have affected walkers, including increased automobile traffic, the attention of the marketing industry, and pedestrian regulations. The work examines the contemplative, psychological, and observational qualities of walking, as well as famous personalities including Leonardo da Vinci, William Shakespeare, John Keats, and John James Audubon, who endorsed these intellectual qualifications. During the 1970s fitness boom, walking was reinvented yet again, becoming an activity of numbers and equations as participants fought to maximize health benefits. The book concludes with a legal analysis of pedestrianism as it relates to sharing space with the automobile.
