The Great Core Curriculum Debate James Wilson, Tells us who we are where we live how fast we are growing what languages we speak what religions we practice and more by imagining the whole world is a village of 100 people The Great Core Curriculum Debate ,1979 *50 Hours* Lynne V. Cheney,1989 **Cultivating Inquiry-Driven Learners** Clifton Conrad,Laura Dunek,2020-08-04 How can colleges develop learners who pursue innovative ideas that enable them to flourish and contribute in a rapidly changing world Two decades into the twenty first century our nation s colleges and universities no longer embrace a clear and convincing definition of the purpose of a college education Instead most institutions have fallen prey to a default purpose in which college is essentially workforce preparation for jobs that already exist while students are viewed as commodities instead of being educated to flourish throughout their lives But rather than bemoan the diminishing legacy of liberal education this new edition of *Cultivating Inquiry Driven Learners* argues that the time has come to advance a pioneering purpose of college that guides the undergraduate experience from program requirements to teaching and learning This purpose Clifton Conrad and Laura Dunek write is anchored in the premise that the world in which we live is one in which change environmental cultural economic political is a constant driving force The authors envision a college educated person in the twenty first century as an inquiry driven learner a person equipped with the capabilities to explore and cultivate ideas that will prepare them to successfully navigate constant change capitalize on career opportunities enrich their personal life and contribute to the public good They describe four signature capabilities that students must develop in order to innovate and adapt core qualities of mind critical thinking skills expertise in divergent modes of inquiry and the capacity to express and communicate ideas Guided by this trailblazing vision Conrad and Dunek have thoroughly revised every chapter of the book to reflect current scholarship and emerging trends In an expanded conclusion they provide a cornucopia of ideas for replenishing undergraduate education accompanied by real world examples of innovative programs and practices from colleges and universities across the United States Throughout *Cultivating Inquiry Driven Learners* challenges stakeholders from across higher learning faculty students staff administrators and policymakers to reflect on the purpose of college embrace innovation and ensure that students are educated to thrive in and contribute to our constantly changing world *The Marketplace of Ideas: Reform and Resistance in the American University (Issues of Our Time)* Louis Menand,2010-12-06 Crisp and illuminating well worth reading Wall Street Journal The publication of *The Marketplace of Ideas* has precipitated a lively debate about the future of the American university system what makes it so hard for colleges to decide which subjects are required Why are so many academics against the concept of interdisciplinary studies From his position at the heart of academe Harvard professor Louis Menand thinks he s found the answer Despite the vast social changes and technological advancements that have revolutionized the society at large general principles of scholarly organization curriculum and philosophy have remained remarkably static Sparking a long overdue debate about the future of

American education The Marketplace of Ideas argues that twenty first century professors and students are essentially trying to function in a nineteenth century system and that the resulting conflict threatens to overshadow the basic pursuit of knowledge and truth
