Towards A Liveable And Sustainable Urban Environment: Eco-cities In East Asia Liang Fook Lye, Gang Chen, 2010-06-17 With cities rapidly encroaching onto surrounding lands the notion of eco city proposes an innovative yet pragmatic approach to designing building and operating cities in a way that the destructive impact of human urban activity upon nature will be significantly reduced This book comprises of papers from a workshop organized by the East Asian Institute on Eco cities in East Asia on 27 February 2009 in Singapore Contributed by scholars officials and environmental specialists from Japan China Malaysia Indonesia Thailand and the Philippines the papers focus on how individual governments in these countries undertake eco city projects The book also highlights best practices that are

useful to policy makers and anyone else who seeks to learn from the experiences of other countries in order to reduce their ecological footprints

At what Cost Nicholas Freudenberg, 2021 An incisive and powerful investigation of corporate impact on human and planetary well being Freedom of choice lies at the heart of American society Every day individuals decide what to eat which doctors to see who to connect with online and where to educate their children Yet many Americans don't realize that these choices are illusory at best By the start of the 21st century every major industrial sector in the global economy was controlled by no more than five transnational corporations and in about a third of these sectors a single company accounted for more than 40 percent of global sales The available options in food healthcare education transportation and even online presence are largely constructed by corporations whose sweeping influence have made them the public face and executive agents of 21st century capitalism At What Cost confronts how globalization financial speculation monopolies and control of science and technology have enhanced the ability of corporations and their allies to overwhelm influences of government family community and faith As corporations manipulate demand through skillful marketing and veto the choices that undermine their bottom line free consumer choice has all but disappeared and with it the personal protections guarding our collective health At What Cost argues that the world created by 21st century capitalism is simply not fit to solve our most serious public health problems from climate change to opioid addiction However author and public health expert Nicholas Freudenberg also shows that though the road is steep human and planetary well being constitute a powerful mobilizing idea for a new social movement one that will restore the power of individual voice to our democracy With impeccably detailed research and an eye towards a better future At What Cost arms ordinary citizens activists and health professionals with an understanding of how we've arrived at the precipice and what we can do to ensure a healthier collective future

Sustainable Horticulture Development and Nutrition Security (Vol. 3) Prem Nath, 2018-01-01 We all are indebted to nature for providing us food and its resources for our subsistence and survival In the food domain cereal and legume grains occupy the front line whereas horticultural crops have occupied the second line of defense For healthy diet cereals and legumes provide us with carbohydrates and protein whereas fruits and vegetables provide us minerals and vitamins Both macro and micro nutrients are essential for human growth and development The fruits and vegetables are the major source of micro nutrients It is estimated that up to 2.7 million lives could potentially be saved each year if fruit and vegetable production was sufficiently increased Both at national and international levels food and agriculture horticulture development plans and estimates are basically developed framed and implemented and narrowed down to cereal production In the present context of attaining nutrition security this mode of thinking on food needs to be changed to nutrients which will include necessarily all those crops including fruit and vegetables which provide all macro and micro nutrients to ensure balanced nutrition needed for good human health The present publication has attempted to reflect and discuss the above views and ideas on the subject of sustainable horticulture development and nutrition security in nine chapters with 32 articles by 32

Remarkably more than half of the world's population now lives in cities and the numbers grow daily as people abandon rural areas. This fully updated and revised seventh edition of the classic text offers readers a comprehensive set of tools for understanding world regional geography as seen through the urban landscape and by extension the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, noted experts explore the major global regions. Each regional chapter considers urban history, economy, culture, and environment, as well as special problems and future prospects. A regional map that shows the major cities, a summary of basic statistical information about the cities and urbanization in each region, and a list of ten salient points about that region's urban experience frame each region. Chapters conclude with a list of references including films and webpages which can be used by the student and instructor for additional information about specific cities. This edition adds the important new themes of climate change and migration while continuing to focus specifically on sustainability, water technology, social and environmental justice, security, and conflict. The history of urban settlement, urban planning trends, and daily life. Vignettes of key cities give the reader a vivid understanding of daily life and the spirit of place. The opening chapter presents an overview of key terms and concepts and explores contemporary world urbanization, and a concluding chapter projects the world's urban future. Generously illustrated in full color with a new selection of photographs, maps, and diagrams, the text also includes a rich array of textboxes to highlight key topics ranging from migration and immigration to LGBTQ activism, human security, and climate change. Clearly written and timely, *Cities of the World* will be invaluable for those teaching introductory or advanced classes on global cities, regional geography, the developing world, and global urban studies.

GrEEEn Solutions for Livable Cities Sonia Chand Sandhu, Ramola Naik Singru, John Bachmann, Vaideeswaran Sankaran, Pierre Arnoux, 2016-02-01. This publication is a result of a 2-year innovative exploratory and reflective study of cities as unique urban spaces that support life, work, and play. It responds to major issues that affect the quality of life of urban residents. This publication offers practical ways on how urban managers, urban practitioners, businesspeople, and citizens can engage to make cities more livable by building on their distinctive physical, social, cultural, and economic characteristics. With the adoption of the Sustainable Development Goals by the United Nations, the book comes at the right time to offer integrated urban development solutions that can translate global development commitments into urban-level actions to achieve livable cities.
