The Greenpeace Of The Nuclear Age:

The Greenpeace Book of the Nuclear Age John May, 1989 Examines accidents and risk the nature of chance and the oppressive weight of secrecy official lies and the true cost of atomic energy **The Oceans in the Nuclear Age** David D. Caron, Harry N. Scheiber, 2014-07-17 The advent of the nuclear age in 1945 fundamentally altered the course of human events The oceans are not the focus of the nuclear age but the affairs of the oceans are deeply woven into the history of that age Knowledge of what the nuclear age has meant for the oceans however is highly fragmented and there exists a surprising gap in research on the impact of the nuclear age on the oceans and on ocean law and policy Ranging from dumped wastes to transportation to security this study frames the complex multidimensional set of relationships between the oceans and the nuclear age and illuminates patterns of impact and response in ocean law This timely expanded edition includes a new chapter by Lt Todd Hutchins USN on Nuclear Risks in Coastal Areas Legal and Regulatory Responses It provides a full discussion of the 2011 coastal Fukushima Nuclear Power Plant disaster together with analysis more generally of the challenges to the environment and to the legal order globally that are posed by coastal siting of nuclear power plants

Film and the Nuclear Age Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography chronology Illustrated *Plutonium, Deadly Gold of the Nuclear Age* Howard Hu, Arjun Makhijani, Katherine Yih, 1992 **The Global Third Nuclear Age** Andrew Futter, Ludovica Castelli, Cameron Hunter, Olamide Samuel, Francesca Silvestri, Benjamin Zala, 2025-01-17 This book provides an in depth examination of the technological geopolitical and normative pressures driving the world into a new more complex and potentially more dangerous Third Nuclear Age By adopting an innovative framework for analysis the book challenges the constrained focus of much of the existing literature by explaining that the pathways to nuclear security for different actors across the globe will vary considerably in this new context It argues that the Third Nuclear Age will be defined by friction and conflict between Nuclear Traditionalists Technological Transformers Hedgers and Balancers and Activists and Protestors as different interests and visions of the nuclear future clash The book draws on dozens of interviews

and non English language sources to provide a global approach and looks at the security politics driving the political debate in 20 different countries across the globe This book will be of much interest to students of nuclear politics security studies and International Relations The Open Access version of this book available at www.taylorfrancis.com has been made

available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Utopias and Utopians** Richard C.S. Trahair,2013-10-31 Utopian ventures are worth close attention to help us understand why some succeed and others fail for they offer hope for an improved life on earth Utopias and Utopians is a comprehensive guide to utopian communities and their founders Some works look at literary utopias or political utopias etc and others examine the utopias of only one country this work examines utopias from antiquity to the present and surveys utopian efforts around the world Of more than 600 alphabetically arranged entries roughly half are descriptions of utopian ventures the other half are biographies of those who were involved Entries are followed by a list of sources and a general bibliography concludes the volume **Places of Public Memory** Greg Dickinson,Carole Blair,Brian L. Ott,2010-08-02 Though we live in a time when

memory seems to be losing its hold on communities memory remains central to personal communal and national identities And although popular and public discourses from speeches to films invite a shared sense of the past official sites of memory such as memorials museums and battlefields embody unique rhetorical principles Places of Public Memory The Rhetoric of Museums and Memorials is a sustained and rigorous consideration of the intersections of memory place and rhetoric From the mnemonic systems inscribed upon ancient architecture to the roadside acci **The Culture of Nature** Alexander Wilson,2019-10-10 Since it was first published in 1991 few books have come close to capturing the depth and breadth of Alexander Wilson s innovative ecocultural compendium The Culture of Nature His work was one of the first of its kind to investigate the ideology of the environment to critique the future according to Disney and illustrate that the ways we think teach talk about and construct the natural world are as important a terrain as the land itself Extensively illustrated and meticulously researched this edition is exquisitely revised and reissued for the Anthropocene **Theorizing Culture: Critique** Barbara Adam,Stuart Allan,2015-01-28 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company **Theorizing Culture** Barbara Adam,Stuart Allan,2006-04-07 This highly original and timely volume engages

Larsen,James M.

Smith,2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers Jeffrey A Larsen and James M Smith present a context for the broader range of international relations at a given point in time extending the utility of the dictionary beyond just a narrow examination of arms control BOOK JACKET

Bauer,2015-02-11 Atom byte and gene are metonymies for techno scientific developments of the 20th century nuclear power computing and genetic engineering Resistance continues to challenge these developments in public opinion This book traces historical debates over atoms bytes and genes which raised controversy with consequences and argues that public opinion is a factor of the development of modern techno science The level and scope of public controversy is an index of resistance examined here with a pain analogy which shows that just as pain impacts movement resistance impacts techno scientific mobilization it signals that something is wrong and this requires attention elaboration and a response to the challenge This analysis shows how different fields of enquiry deal with the resistance of social psychological mentalities in the face of industrial scientific and political activities inspired by projected futures
