Transnational Encounters Alejandro L. Madrid,2011-09-29 Through the study of a large variety of musical practices from the U S Mexico border Transnational Encounters seeks to provide a new perspective on the complex character of this geographic area By focusing not only on norte a banda or conjunto musics the most stereotypical musical traditions among Hispanics in the area but also engaging a number of musical practices that have often been neglected in the study of this border s history and culture indigenous musics African American musical traditions pop musics the authors provide a glance into the diversity of ethnic groups that have encountered each other throughout the area s history Against common misconceptions about the U S Mexico border as a predominant Mexican area this book argues that it is diversity and not homogeneity which characterizes it From a wide variety of disciplinary and multidisciplinary enunciations these essays explore the transnational connections that inform these musical cultures while keeping an eye on their powerful local significance in an attempt to redefine notions like border nation migration diaspora etc Looking at music and its performative power through the looking glass of cultural criticism allows this book to contribute to larger intellectual concerns and help redefine the field of U S Mexico border studies beyond the North South and American Mexican dichotomies Furthermore the essays in this book problematize some of the widespread misconceptions about U S Mexico border history and culture in the current debate about immigration

**A History of Political Murder in Latin America** W. John Green,2015-04-27 A

sweeping study of political murder in Latin America This sweeping history depicts Latin America's pan regional culture of political murder Unlike typical studies of the region which often focus on the issues or trends of individual countries this work focuses thematically on the nature of political murder itself comparing and contrasting its uses and practices throughout the region W John Green examines the entire system of political murder the methods and justifications the perpetrators employ the victims and the consequences for Latin American societies Green demonstrates that elite and state actors have been responsible for most political murders assassinating the leaders of popular movements and other messengers of change Latin American elites have also often targeted the potential audience for these messages through the region's various dirty wars In spite of regional differences elites across the region have displayed considerable uniformity in justifying their use of murder imagining themselves in a class war with democratic forces While the United States has often been complicit in such violence Green notes that this has not been universally true with US support waxing and waning A detailed appendix exploring political murder country by country provides an additional resource for readers

**Dispatches from the Field** Andrew Gardner, David M. Hoffman, 2006-04-17 Penned by advanced graduate students amidst their dissertation fieldwork these provocative essays capture the challenges and intricacies of that anthropological rite of passage The collections authors frankly portray the mistakes they made in the field their struggle to analyze the events unfolding before their eyes the psychological and emotional frustration seemingly endemic to doing ethnography and the ethical complexities of researching living people The authors present these essays not as models of ideal fieldwork or as a series of lessons about how to overcome potential hurdles one faces in the field but rather as a window into the complexities of being an ethnographer in the contemporary world Against a backdrop of subject populations increasingly informed about global relations of power and more specifically informed about the topography of American imperialism these humanistic essays vividly reflect recent shifts in both the focus and methods of anthropological research as well as the dilemmas underlying the construction of anthropological knowledge They are meant to spark discussion and debate While tailored to an audience relatively new to ethnographic fieldwork and intended as a teaching tool this collection should appeal to anthropologists and ethnographers at all points in their career
