Seven Years' Residence in the Great Deserts of North America Emmanuel Domenech, 1860 **Seven Years' Residence in the Great Deserts of North America** Em. Domenech, 2022-08-04 Reprint of the original first published in 1860

Travels in the Great Desert James Richardson, 2013-10-15 First published in 1970 Part of a collection on African Studies this text is a narrative of the personal adventures of the author during a tour of nine months through the desert amongst the Touaricks and other tribes of the Saharan people and includes a description of the oases and cities of Ghat Ghadames and Mourzuk This is Volume I of two **Building Fjords in the Great Deserts** James Michael

Matthew, 2024-05-30 After the United Nations held its 2023 Climate Change Conference it became vogue to label the fossil fuels industry as the elephant in the room But it s really just the tiny baby elephant The real elephant in the room the one that no one wants to acknowledge let alone talk about is that net zero carbon and sustainability will never work to defeat climate change It s also not practical as it would result in the destruction of economies and force people to live lives they do not want to live Even if it could be achieved it would not fix rising ocean coastlines biodiversity loss desertification and climate change James Michael Matthew the founder and chairman of JM Prophecies Corp and the author of numerous books on how to defeat climate change proposes the perfect solution in this book building fjords in the great deserts His plan to defeat climate change begins with pumping ocean water into salt basins that already exist in deserts and arid regions around the world Consider what s at stake and find out how the author s strategy could be implemented step by step in this groundbreaking work **Travels in the Great Desert of Sahara, in the Years of 1845 and 1846** James Richardson, 1848

Travels in the Great Desert of Sahara in the Years of 1845 & 1846 James Richardson, 1848 **Travels Through Central Africa to Timbuctoo and Across the Great Desert to Morocco, 1824-28** Rene Caillie, 2013-11-05 Rene Caillie was the first European who penetrated to Timbuctoo and returned to communicate the information he had collected This account was first published in 1830 and records observations of a journey of 4500 miles of which 3000 were hitherto unknown to Europeans Travels through Central Africa to Timbuctoo and across the Great Desert to Morocco performed in the year 1824-1828, Vol. II René Caillié, 2023-04-06 Travels through Central Africa to Timbuctoo and across the Great Desert to Morocco performed in the year 1824 1828 Vol II is a travelogue written by Ren Cailli a French explorer who made a journey to Timbuktu and back in the early 19th century In the second volume of his work Cailli details his return journey from Timbuktu to Morocco covering a distance of approximately 3 000 miles He describes the people and cultures he encounters along the way including the Tuareg people and provides a wealth of information on the geography flora and fauna of the region The narrative is both informative and engaging providing a fascinating glimpse into the world of West Africa during this time period Great Desert Explorers Andrew Goudie, 2016-12-01 Desert exploration like climbing Everest or polar expeditions is not for the faint hearted and many of the vivid tales within this fascinating biographical history end in

tragedy However the informative and absorbing descriptions of the extraordinary journeys challenges and achievements of these intrepid figures are captivating They risked their lives variously for good old fashioned epic adventure solitude fame the answer to mythical questions and some were even spies They experienced fear excitement and hardship in their journeys into the unknown There are many books on exploration but remarkably few on desert exploration Moreover some of the great desert explorers of the last three hundred years are now very little remembered or appreciated in comparison say with those who ventured to the poles climbed Everest or sought the source of the Nile Yet crossing unknown deserts is no less challenging This volume finally brings these Great Desert Explorers into the limelight with short illustrated biographies of around 60 of the most interesting intrepid and important explorers of the world s greatest deserts There is also a brief introduction to each desert region The many original quotations illustrations and maps contemporary figures as well as plates of a range of desert landscapes make this a colourful lively and informative read *Largest Deserts* Yves

The Desert Michael Welland,2014-09-15 From endless sand dunes and prickly cacti to shimmering mirages and green oases deserts evoke contradictory images in us They are lands

of desolation but also of romance of blistering Mojave heat and biting Gobi cold Covering a quarter of the earth's land mass and providing a home to half a billion people they are both a physical reality and landscapes of the mind The idea of the desert has long captured Western imagination put on display in films and literature but these portrayals often fail to capture the true scope and diversity of the people living there Bridging the scientific and cultural gaps between perception and reality The Desert celebrates our fascination with these arid lands and their inhabitants as well as their importance both throughout history and in the world today Covering an immense geographical range Michael Welland wanders from the Sahara to the Atacama depicting the often bizarre adaptations of plants and animals to these hostile environments He also looks at these seemingly infertile landscapes in the context of their place in history as the birthplaces not only of critical evolutionary adaptations civilizations and social progress but also of ideologies Telling the stories of the diverse peoples who call the desert home he describes how people have survived there their contributions to agricultural development and their emphasis on water and its scarcity He also delves into the allure of deserts and how they have been used in literature and film and their influence on fashion art and architecture As Welland reveals deserts may be difficult to define but they play an active role in the evolution of our global climate and society at large and their future is of the utmost importance

Entertaining informative and surprising The Desert is an intriguing new look at these seemingly harsh and inhospitable landscapes **The Eyes of the Desert Rats** David Syrett, 2014-08-19 Made up of members of the Coldstream and Scots Guards British Yeomanry cavalry regiments New Zealanders South Africans and Indian Army men the Long Range Desert Group was perhaps the most effective of all the special forces established by the Allies during the Second World War It was able to go thousands of miles into enemy territory well armed and carrying its own supplies of petrol food and even water to last for weeks at a time something quite new in military history Using experience acquired in WWI and inter war exploration travels the LRDG thus developed the ability to appear almost anywhere in the desert to carry out almost every type of ground reconnaissance mission possible in desert warfare exploring and mapping the terrain transporting agents behind enemy lines or determining the strength and location of enemy forces with an extraordinary degree of accuracy and detail and thus able to verify or hide Ultra intelligence Equally important were their skills in the art of desert navigation demonstrated in the outflanking of the enemy during the Allied advance from El Alamein westward to Tunisia as led by the LRDG Once it had teamed up with the Special Air Service SAS made up of British Free French Commonwealth and Jewish Palestinian soldiers the LRDG perfected the art of irregular mechanized warfare conducted in the rear of the enemy's forces in the desert attacking enemy installations of all kinds mining roads raiding airfields destroying enemy aircraft on the ground and inflicting losses upon the enemy in inverse proportion to their own remarkably low rate of casualties Through meticulous research in original archival material this book thus tells the extraordinary story of how a relatively small number of dedicated men developed the methods and techniques for crossing by motor vehicle the depths of the then unmapped and

seemingly impassable great deserts of Egypt and Libya the Western Desert during the British Army's North African Campaign of 1940-43 The Long Range Desert Group and the Special Air Service as a matter of course did extraordinary things the heroic was the commonplace Their tactics techniques and remarkable success in desert warfare continue to make them of great interest to the student of military affairs Likewise as it seeks to answer how the deep desert can best be used for military purposes this study is pertinent to today's military operations perhaps more so than at any time since World War II this study provides fresh insights into the nature of desert warfare past present and future and reveals the peculiarities of this warfare often lost to modern armies a virtual primer useful to commanders and soldiers alike At long last this book can find its rightful place in the classroom of military courses and colleges and in the hands of those interested in the intricacies complexities and problems of military operations in desert regions From the Foreword to the book by Colonel Retired David M Glantz *Riverside County Farm Bureau Monthly* ,1923 Desertification and Land Degradation Ajai,Rimjhim Bhatnagar,2022-03-30 Desertification and land degradation are complex phenomena and we need to understand their causes consequences and means to mitigate and combat their impact Therefore this book aims to explain the concept and characteristics of drylands desert and desertification land degradation wastelands and the concept of ecosystem services It also discusses various types of processes of land degradations their characteristics physics and indicators along with mapping monitoring and assessment of methods involved Concept of Ocean Biological Deserts is discussed along with international and regional efforts towards combating land degradation and desertification Key Features Provides all the aspect of desertification and land degradation at one place Includes comprehensive methods to monitor different desertification land degradation processes Comprehensive overview of the mapping monitoring and modelling techniques Role of space borne data in identifying monitoring and combating desertification is evaluated and reported with real case studies Explains the concept of ocean biological deserts their characteristics and mapping *The Saturday Evening Post* ,1929 *Geography generalized; or, an Introduction to the study of geography ... and an introduction to astronomy ...
