Douglas H. Erwin, 1993 Carefully examines the events recorded at the major Permo Triassic boundary sections and documents the patterns of extinction and survival among the major groups of marine and terrestrial plants and animals Erwin also provides a detailed summary of the climatic geologic geophysical and geochemical events of the Late Permian and Early Triassic

The Worst of Times Paul B. Wignall, 2015-09-29 Unraveling the mystery of the catastrophic age of extinctions Two hundred sixty million years ago life on Earth suffered wave after wave of cataclysmic extinctions with the worst wiping out nearly every species on the planet *The Worst of Times* delves into the mystery behind these extinctions and sheds light on the fateful role the primeval supercontinent known as Pangea might have played in causing these global catastrophes Drawing on the latest discoveries as well as his own firsthand experiences conducting field expeditions to remote corners of the world Paul Wignall reveals what scientists are only now beginning to understand about the most prolonged and calamitous period of environmental crisis in Earth's history Wignall shows how these series of unprecedented extinction events swept across the planet killing life on a scale more devastating than the dinosaur extinctions that would follow *The Worst of Times* unravels one of the great enigmas of ancient Earth and shows how this ushered in a new age of vibrant and more resilient life on our planet

Ancient Life of the Great Lakes Basin J. Alan Holman, 1995 A review of the ancient life of the Great Lakes Basin from the Precambrian through the Ice Age

Fiction and the Sixth Mass Extinction Jonathan Elmore, 2020-04-01 Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction's engagements with human driven extinction Drawing together a diverse group of scholars and approaches this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli fi with texts and media typically not associated with Anthropocene fictions The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction This volume takes up the collective insistence on the centrality of story to extinction studies In various and disparate ways each chapter engages with the stories we tell about extinction about the extinction of animal and plant life and about the extinction of human life itself Answering the call to action of extinction studies these chapters explore what kinds of humanity caused this event and what kinds may live through it what cultural assumptions and values led to this event and which ones could lead out of it what relationships between human life and this planet allowed the sixth mass extinction and what alternative relationships could be possible

Forsaken Earth: The Ongoing Mass Extinction Paul Sequoia Rauch, 2016-07-28 The Ongoing Mass Extinction of species is the most overriding issue on Earth transcending and encompassing all others It's already proven there's no debate It is a monumental event occurring right now and escalating its culmination set to happen within most of our lives *Forsaken Earth* delves deeply into this matter like no other that the worst of this earth shattering extinction event might still be avoided *Forsaken Earth* fully reveals that humans are undeniably causing and allowing this event to happen and that we are the only ones who can and must stop it Everything you ever wanted to know about our gorgeous Earth to the history of

the cultural ideology at the root of the problem to the effect upon every ecosystem of Earth is written in this one potent volume Forsaken Earth provides more solutions than any yet offered and leads us to discover and activate our most meaningful purpose individually and as humanity to participate and truly support the healing of life on Earth now **Mass Extinction** Ashraf M.T. Elewa,2007-12-03 The present book combines three main aspects five major mass extinctions contributions on some other minor extinctions and more importantly contributions on the current mass extinction All three aspects are introduced through interesting studies of mass extinctions in diverse organisms ranging from small invertebrates to mammals and take account of the most accepted subjects discussing mass extinctions in insects mammals fishes ostracods and molluscs *Biotic Recovery from Mass Extinction Events* M. B. Hart,1996 Engl **The Late Devonian Mass Extinction** George R. McGhee,1996 Based on two decades of research The Late Devonian Mass Extinction reviews the many theories that have been presented to explain the global mass extinction that struck the earth over 367 million years ago considering in particular the possibility that the extinction was triggered by multiple impacts of extraterrestrial objects The Great Ordovician Biodiversification Event Barry D. Webby,Florentin Paris,Mary L. Droser,Ian G. Percival,2004-04-14 Two of the greatest evolutionary events in the history of life on Earth occurred during Early Paleozoic time The first was the Cambrian explosion of skeletonized marine animals about 540 million years ago The second was the Great Ordovician Biodiversification Event which is the focus of this book During the 46 million year Ordovician Period 489 443 m y a bewildering array of adaptive radiations of Paleozoic and Modern type biotas appeared in marine habitats the first animals arthropods walked on land and the first non vascular bryophyte like plants based on their cryptospore record colonized terrestrial areas with damp environments This book represents a compilation by a large team of Ordovician specialists from around the world who have enthusiastically cooperated to produce this first globally orientated internationally sponsored IGCP International Geological Correlation Program project on Ordovician biotas The major part is an assembly of genus and species level diversity data for the many Ordovician fossil groups The book also presents an evaluation of how each group diversified through Ordovician time with assessments of patterns of change and rates of origination and extinction As such it will become the standard work and data source for biotic studies on the Ordovician Period Carboniferous Giants and Mass Extinction George R. McGhee Jr.,2018-08-07 Picture a world of dog sized scorpions and millipedes as long as a car tropical rainforests with trees towering over 150 feet into the sky and a giant polar continent five times larger than Antarctica That world was not imaginary it was the earth more than 300 million years ago in the Carboniferous period of the Paleozoic era In Carboniferous Giants and Mass Extinction George R McGhee Jr explores that ancient world explaining its origins its downfall in the end Permian mass extinction the greatest biodiversity crisis to occur since the evolution of animal life on Earth and how its legacies still affect us today McGhee investigates the consequences of the Late Paleozoic ice age in this comprehensive portrait of the effects of ancient climate change on global ecology Carboniferous Giants and Mass

Extinction examines the climatic conditions that allowed for the evolution of gigantic animals and the formation of the largest tropical rainforests ever to exist which in time turned into the coal that made the industrial revolution possible and fuels the engine of contemporary anthropogenic climate change Exploring the strange and fascinating flora and fauna of the Late Paleozoic ice age world McGhee focuses his analysis on the forces that brought this world to an abrupt and violent end Synthesizing decades of research and new discoveries this comprehensive book provides a wealth of insights into past and present extinction events and climate change

[The Great Dinosaur Controversy](#) Keith Parsons,2003-12-02 A historical review of the most important scientific controversies that have shaped our knowledge of dinosaurs since the discovery of important fossils in the 1820s In *The Great Dinosaur Controversy A Guide to the Debates* the major scientific disputes that have contributed to the understanding of dinosaurs come to light Each chapter presents a major controversy then ponders the lessons learned and their impact on the scientific field Colorful characters such as anti evolutionist Robert Owen Darwin's bulldog T H Huxley and dinosaur heretic Robert Bakker enliven the debates which range from the origin of dinosaurs and their posture to their evolution or retrogression and whether they were warm or cold blooded Two of the most recent debates concern how dinosaurs became extinct and whether or not birds are their descendents

The Great Tree of Life Douglas Soltis,Pamela Soltis,2018-11-14 *The Great Tree of Life* is a concise approachable treatment that surveys the concept of the Tree of Life including chapters on its historical introduction and cultural connection The Tree of Life is a metaphor used to describe the relationships between organisms both living and extinct It has been widely recognized that the relationship between the roughly 10 million species on earth drives the ecological system This work covers options on how to build the tree demonstrating its utility in drug discovery curing disease crop improvement conservation biology and ecology along with tactics on how to respond to the challenges of climate change This book is a key aid on the improvement of our understanding of the relationships between species the increasing and essential awareness of biodiversity and the power of employing modern biology to build the tree of life Provides a single reference describing the properties history and utility of The Tree of Life Introduces phylogenetics and its applications in an approachable manner Written by experts on the Tree of Life Includes an online companion site containing various original videos to enhance the reader's understanding and experience

[The Perils of Extinction: Exploring Mass Die-offs Throughout History](#) Pasquale De Marco,2025-07-07 *The Perils of Extinction Exploring Mass Die offs Throughout History* takes readers on a journey through the fascinating and complex world of extinction From the earliest mass extinctions to the current biodiversity crisis this book explores the causes and consequences of extinction and the role of humans in shaping the future of life on Earth Extinction is a natural process but human activities have accelerated the rate of extinction to unprecedented levels In *The Perils of Extinction* you will learn about the different types of extinction from background extinctions to mass extinctions You will also learn about the causes of extinction including climate change asteroid impacts volcanic eruptions and sea level changes The effects of extinction can

be devastating Extinction can lead to the loss of biodiversity the disruption of ecosystems and even climate change In *The Perils of Extinction* you will learn about the effects of extinction on the past present and future of life on Earth Humans are playing a major role in the current biodiversity crisis Our activities are destroying habitats polluting the environment and introducing invasive species In *The Perils of Extinction* you will learn about the role of humans in extinction and what we can do to prevent it The future of extinction is uncertain However by understanding the causes and consequences of extinction we can take steps to prevent it from continuing In *The Perils of Extinction* you will learn about the future of extinction and what we can do to protect life on Earth *The Perils of Extinction* is a must read for anyone who is interested in the natural history of Earth the evolution of life or the future of our planet This book is written in a clear and engaging style and it is packed with information and insights I highly recommend it to anyone who wants to learn more about extinction and its impact on the planet If you like this book write a review on google books [Discover Nature in the Rocks](#) Rebecca Lawton,Diana Lawton,Susan Panttaja,1997-06 A friendly introduction to hands on study of nature in your own backyard Simple activities for all ages **The Great Maya Droughts** Richardson B. Gill,2001-04-01 This innovative study argues that the collapse of Classic Maya civilization was driven by catastrophic drought Between A D 800 and 1000 unrelenting drought killed millions of Maya people with famine and thirst and initiated a cascade of internal collapses that destroyed their civilization Linking global regional and local climate change the author explores how atmospheric processes volcanism ocean currents and other natural forces combined to create the dry climate that pried apart the highly complex civilization in the tropical Maya Lowlands in the ninth and tenth centuries Drawing on knowledge of other prehistoric and historic droughts *The Great Maya Droughts* is a useful study of the relationship of humans to their natural and physical environment The author tries to understand why the Classic Maya failed to adjust their behavior and culture to the climatic conditions and why civilizations in general sometimes collapse in the face of radical environmental change *Cretaceous Project 200, Volume 1: The Cretaceous World* M.B. Hart,S.J. Batenburg,B.T. Huber,G.D. Price,N. Thibault,M. Wagerich,I. Walaszczyk,2025-04-02 The Cretaceous was first mentioned in the legend of a geological map largely centred on France published in 1822 by Jean Baptiste Julien d Omalius d Halloy Two hundred years of research have demonstrated that the Cretaceous records some of the highest sea levels atmospheric temperatures and extreme events in Earth history It was also a time of significant palaeogeographical changes and continental fragmentation This volume draws together a collection of papers that demonstrate these particularly Cretaceous events of warm climates sea level change and the impact of major volcanic events on the fauna and flora of the time Geochemical and stable isotope data are used to interpret these changing environments and their impact on the Cretaceous ecosystem The volume closes with a description of the recent drilling of the Chicxulub bolide impact site **Catastrophic Events and Mass Extinctions** Christian Koeberl,Kenneth G. MacLeod,2002
