The new edition uses the concept of cuisine to trace humanity's relationship with food thematically explored through health, sociality and identity. It evaluates dietary change, decent meals and food commodification alongside threats to security and health. Drawing on ethnographic examples, dietary transitions are situated in changing political, economic and social circumstances, presenting a critical approach necessary to explore our current global food system. Chapters on cooking, recipes and eating in and out offer relatable examples underlining the significance of everyday life and incorporating an ethnographic approach that extends into practical exercises aligned with each chapter's themes to highlight the relevancy of our own experiences. Vividly illustrated, the book explores dishes from various global cuisines, offering insights into people's culinary traditions and enriching our understanding and appreciation of food as a fundamental aspect of culture in our daily lives. Ultimately, *Eating Culture* presents a critical examination of how deeply food is entwined with our identity.
