*Islamization in Modern South Asia* David Emmanuel Singh, 2012-08-31 This book explores the religious identity of the indigenous Gujjars living in Rajaji National Park RNP Uttarakhand India In the broader context of forest conservation discourse steps taken by the local government to relocate the Gujjars outside RNP have been crucial in their choice to associate with NGOs and Deobandi Muslims These intersecting associations constitute the context of their transitioning religious identity The book presents a rich account of the actual process of Islamization through the collaborative agency of Deobandi madrasas and Tablighi Jama at Based on documents and interviews collected over four years it constructs a particular case of Deobandi reform and also balances this with a layered description of the Gujjar responses It argues that in their association with the Deobandis the Gujjars internalized the normative dimensions of beliefs and practices but not at the expense of their traditional Hindu folk culture This capacity for adaptation bodes well for the Gujjars but their proper integration with wider society seems assured only in association with the Deobandis Consequently this research also points toward the role of Islam in integrating marginal groups in the wider context of society in South Asia

*Learning from the Slums for the Development of Emerging Cities* Jean-Claude Bolay, Jérôme Chenal, Yves Pedrazzini, 2016-07-29 This book deals with slums as a specific question and a central focus in urban planning It radically reverses the official version of the history of world cities as narrated during decades slums are not at the margin of the contemporary process of urbanization they are an integral part of it Taking slums as its central focus and regarding them as symptomatic of the ongoing transformations of the city the book moves to the very heart of the problem in urban planning The book presents 16 case studies that form the basis for a theory of the slum and a concrete development manual for the slum The interdisciplinary approach to analysing slums presented in this volume enables researchers to look at social and economic dimensions as well as at the constructive and spatial aspects of slums Both at the scientific and the pedagogical level it allows one to recognize the efforts of the slum s residents key players in the past and present development of their neighborhoods and to challenge public and private stakeholders on priorities decided in urban planning and their mismatches when compared to the findings of experts and the demands of users Whether one is a planner an architect a developer or simply an inhabitant of an emerging city the presence of slums in one s environment at the same time central and nonetheless incongruous makes a person ask questions Today it is out of the

question to be satisfied with the assumption of the marginality of slums or of the incongruous nature of their existence Slums are now fully part of the urban landscape contributing to the identity and the urbanism of cities and their stakeholders

**HIV and Young People** Gary Jones, 2015-11-30 Revisiting the thinking on vulnerability to HIV and risk of infection this book provides better understanding by considering the risk of HIV infection alongside notions of personal and collective resilience dignity and humiliation The work shows that young people in the urban slum dignify their world and in doing so establish priorities and draw on a set of references oftentimes intelligible to them alone Moreover humiliation as an interpersonal event adds to a sense of vulnerability and lies closely behind choices directly affecting personal health and livelihood Thus dignity and humiliation are shown for the first time to have a critical role in health seeking and risky behavior related to HIV and this is an area in great need of further research The crucial focus of this work is further emphasized by the rapid growth of urban slums and high rates of HIV among both slum dwellers and young people who continue to bear the brunt of the AIDS epidemic thirty years on This comprehensive literature review provides a compelling argument that the time is right to further explore the nexus of risk and resilience from a people centered perspective Fresh insight is critical to reach the goal of ending AIDS by 2030
