*ECIE2012-7th European Conference on Innovation and Entrepreneurship ,2012* The Oxford Handbook of the Learning Organization Anders Örtengren, 2019-12-17 The concept of the learning organization is one of the most popular management ideas of the last few decades Since it was conceived as an idea in its own right it has been given various definitions and meanings such that we are still faced with the question as to whether any unified understanding of what the learning organization really is can be established This Handbook offers extensive reviews of both new and traditional perspectives on the concept and provides suggestions for how the learning organization can best be defined practiced studied and developed in future research With contributions from long standing scholars in the field as well as those new to the area this book aims to bridge the gap between traditional and more critical perspectives and in doing so find alternative features and angles to take the idea forward In addition to elaborating on and developing older definitions of the learning organization and suggesting updated and even new definitions the chapters also provide focused explorations on pertinent aspects of the learning organization such as ambidexterity gender inclusivity and systems thinking They also survey organizations that have made efforts towards becoming learning organizations how the learning organization can best be

measured and studied and the universality of the idea itself Some of the questions raised in this book are answered or at least given tentative answers while other questions are left open In this way the book has the ambition to take the learning organization an important step further whilst having no intentions to take any final step instead the intention is that others will endeavour to continue where this book stops Handbook of Research in Entrepreneurship Education Alain Fayolle, 2007-01-01 The Handbook of Research in Entrepreneurship Education is well worth reading and both editions are excellent volumes for all of us involved and interested in the debate on how to bring entrepreneurship education forward and whether to create a distinctive domain of entrepreneurship studies Domingo Ribeiro Soriano Academy of Management Learning Education a commendable source of reference for entrepreneurship education researchers and practitioners alike and would make a worthy addition to a library's collection David Douglas International Journal of Entrepreneurial Behaviour and Research In this the second volume of the Handbook of Research in Entrepreneurship Education leading international scholars highlight the unique characteristics and rich variety of research in entrepreneurship education They adopt several different perspectives focusing on key issues and significant developments in the field and highlighting emergent new insights The 35 contributors span 11 countries and three continents demonstrating not only the richness but also the complexity of the field in terms of culture geography and institutional ethical and political systems The Handbook is intended to collectively assist entrepreneurship educators in developing new programmes and pedagogical approaches that take into account the richness and diversity of these multiple perspectives Highlighting the unique characteristics of research in entrepreneurship education this Handbook will be of great interest to entrepreneurship researchers academics and students wishing to understand the unique notions of entrepreneurship education and entrepreneurial learning which are often quite distinct from current practical views The companion volume Handbook of Research in Entrepreneurship Education Volume 1 A General Perspective showcases the nature and benefits of the new wave in entrepreneurship education emerging as a result of revised academic programmes developed to reflect new forms of entrepreneurship **Australian National Bibliography**, 1978 **Resources in Education**, 1997 **Handbook of University-wide Entrepreneurship Education** G. **Handbook on the Entrepreneurial University** Alain Fayolle, Dana T. Redford, 2014-01-01. This insightful Handbook offers a lens through which to view entrepreneurship strategy for higher education institutions as it becomes increasingly necessary for universities to consider changing their strategies, culture, and practices to become more entrepreneurial. Is the idea of an entrepreneurial university a myth or a reality? Is the university model capable of adapting to new evolving trends and a more complex professional world? And what is the impact of entrepreneurship in education? Through extensive research and case studies from some of the leading entrepreneurial thinkers around the world, Alain Fayolle and Dana Redford answer these questions and raise further issues for debate. Particular focus is given to developing university strategy, public policy, and start-up support as a means to foster graduate entrepreneurship. Each contribution explores different perspectives related to the entrepreneurial university concept and its role in stimulating economic growth through cooperative relationships with business and government. As a comprehensive study of the entrepreneurial university, this Handbook will prove invaluable to business and entrepreneurship students and academics, as well as university administrators, researchers, and others interested in the evolution of the university.
