L. Hamilton,2010-07-05 The Northeastern Trans Pecos region of Texas is an unforgiving environment for anyone living off
the land yet nomadic hunters and gatherers roamed its deserts and mountains and sheltered in caves and sinkholes from
around AD 200 to 1450 This book provides detailed insights into the lifeways of these little known prehistoric peoples It
places their occupation of the region in a wider temporal and cultural framework through a comprehensive description and
analysis of the archaeological remains excavated by Donny L Hamilton at Granado Cave in 1978 Hamilton begins with a brief
overview of the geology and environment of the Granado Cave area and reviews previous archaeological investigations Then
he and other researchers present detailed analyses of the burials and other material remains found in the cave as well as the
results of radiocarbon dating From these findings he reconstructs the subsistence patterns and burial practices of these
Native Americans whom he identifies as a distinct group that was pushed into the environment by surrounding peoples He
proposes that they should be represented by a new archaeological phase thus helping to clarify the poorly understood late
