**Mahan, Corbett, and the Foundations of Naval Strategic Thought** Kevin D McCranie, 2021-02-15 At the turn of the twentieth century Alfred Thayer Mahan and Julian Stafford Corbett emerged as foundational thinkers on naval strategy and maritime power Important in their lifetimes their writings remain relevant in the contemporary environment The significance of Corbett and Mahan to modern naval strategy seems beyond question but too often their theories are simplified or used without a real understanding of their fundamental bases Labeling a strategy operation or even a navy Mahanian or Corbettian tells very little Mahan Corbett and the

Foundations of Naval Strategic Thought provides an in depth introduction and a means to stimulate discussion about the theories of Mahan and Corbett Although there is no substitute for opening the actual writings of Mahan and Corbett this requires time not just to read but most importantly to understand how states exploit the sea in the strategic sense Mahan Corbett and the Foundations of Naval Strategic Thought takes the reader from their grand strategic foundations of sea power and maritime strategy through their ideas about naval warfare and strategy to how Mahan and Corbett thought a navy should integrate with other instruments of national power and finally to how they thought states with powerful navies win wars This window into naval strategy provides twenty first century readers an understanding of what navies can and perhaps more importantly cannot do in the international environment

The Strategic Use of Force in Counterinsurgency Miles Kitts,2020-01-13 The Strategic Use of Force in Counterinsurgency Find Fix Fight focuses on how to understand the relationship between the use of force and the outcomes of such use Specifically there is debate as to how to evaluate counterinsurgency conflicts and what prescriptions flow from that evaluation The Neo Classicist school emphasises prescriptions which are either directly from or inspired by Cold War counterinsurgency efforts undertaken by anti communist states The Revisionist school focuses on how best to evaluate the political dimensions of such conflicts This book finds that a third approach Reflective Action is best as it combines Neo Classicism s strength of issuing practical prescriptions with Revisionism s strength for conceptually evaluating counterinsurgency conflicts This conceptual debate is exposted in three cases They are the British counterinsurgency during the Malayan Emergency of the 1940s and 1950s American counterinsurgency in South Vietnam during the 1960s and 1970s and the Coalition counterinsurgency in Iraq during the 2000s

**The Price of Victory** N A M Rodger, 2024-10-24 The final instalment of N A M Rodger's definitive authoritative trilogy on Britain's naval history At the end of the French and Napoleonic wars British sea power was at its apogee But by 1840 as one contemporary commentator put it the Admiralty was full of intellects becalmed in the smoke of Trafalgar How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses All the great

*Race and Imperial Defence in the British World, 1870-1914* John C. Mitcham, 2016-03-17 A comprehensive account of how British race patriotism shaped the defense partnership between Britain and the dominions before the Great War.

**The Crimean War** Professor Andrew Lambert, 2013-07-28 In contrast to every other book about the conflict, Andrew Lambert's ground breaking study *The Crimean War: British Grand Strategy against Russia 1853-1856* is neither an operational history of the armies in the Crimea nor a study of the diplomacy of the conflict. The core concern is with grand strategy: the development and implementation of national policy and strategy. The key concepts are strategic, derived from the works of Carl von Clausewitz and Sir Julian Corbett, and the main focus is on naval not military operations. This original approach rejected the Continentalist orthodoxy that dominated contemporary writing about the history of war, reflecting an era when British security policy was dominated by the Inner German Frontier, the British Army of the Rhine and Air Force Germany. Originally published in 1990, the book appeared just as the Cold War ended; the strategic landscape for Britain began shifting away from the continent and new commitments were emerging that heralded a return to maritime strategy as adumbrated in the defence policy papers of the 1990s. With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War, the new edition makes this essential book available to a new generation of scholars.

**Imperial Defence** Greg Kennedy, 2007-11-21 This new collection of essays from leading British and Canadian scholars presents an excellent insight into the strategic thinking of the British Empire. It defines the main areas of the strategic decision making process that was known as Imperial Defence. The theme is one of imperial defence and defence of empire, so chapters will be historiographical in nature, discussing the major features of each key component of imperial defence: areas of agreement and disagreement in the existing literature, on critical interpretations, introducing key individuals and positions, and commenting on the appropriateness of existing studies as well as identifying a raft of new directions for future research.
