**NATO Doctrine, Strategy, and Readiness** Charles W. Harper, 1983      **Air University Review** ,1985-03      **Air University Quarterly Review** ,1965      **China's Aerospace Strategy** ,2013-02-15 China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future Comprehensive military modernisation programs sustained economic scientific and technological developments have substantially elevated China's international profile For the past three decades China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads It has also been developing new and complex military platforms that would be of great value to joint operations warfare The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms and to adopt modern operational concepts including network centric warfare China's air force is in the midst of a transformation A decade ago it was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts Today the PLAAF appears to be on its way to becoming a modern highly capable air force for the 21st century The PLA Air Force has continued expanding its inventory of long range advanced SAM systems and now possesses one of the largest such forces in the world The January 2011 flight test of China's next generation fighter prototype the J 20 highlights China's ambition to produce a fighter aircraft that incorporates stealth attributes advanced avionics and super cruise capable engines over the next several years China is upgrading its B 6 bomber fleet with a new longer range variant that will be armed with a new long range cruise missile China's aviation industry is developing several types of airborne early warning and control system AWACS aircraft These include the KJ 200 based on the Y 8 airframe for AWACS as well as intelligence collection and maritime surveillance and the KJ 2000 based on a modified Russian IL 76 airframe China can decisively defeat India in any nuclear confrontation but is currently unable to match the IAF in any conventional conflict specifically along the border region of the Himalayas Also the IAF has greater experience than PLAAF in actual combat operations with its many conflicts India is gradually building powerful military capabilities in tune with its expanding geopolitical interests even as the eastern and western fronts are being strengthened to deter the twin Pakistan China threat IAF is on the path to transform into a true aerospace power with the capability to rapidly deploy and operate at great distances As for the two front

challenge apart from progressively basing Sukhoi 30MKI fighters and missile squadrons in the two theatres the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions In order to achieve further success in the space arena developments in cryogenic technology are important for India These should be pursued in order to develop the capability of launching 4 5 ton satellites which will help in achieving a greater commercial edge Programmes like moon and mars missions using robotic technologies are also important in order to know more about the nature of resources especially minerals available on these bodies and undertaking their mining It is also important to work towards launching satellites for India s armed forces which will help gain an advantage over adversaries The book is an attempt to analyse the strategic importance of rising economic political and military stature of China with a view to understand its regional and global implications in a new world order As a rational actor in a chaotic world China will defend its security interests at all costs Besides undertaking a comprehensive modernisation of its armed forces China is developing a series of offensive space capabilities while advocating the peaceful use of outer space The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind s history of warfare The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms Hence China s aerospace strategy and its implications for India assume greater military importance

**Department of Defense Appropriations for Fiscal Year ...** United States. Congress.

Senate. Committee on Appropriations,1975      **The Air Weapon** Andrew G.B. Vallance,2016-07-27 Air power today dominates virtually all military operations yet it remains the least well understood form of armed force Technical and tactical details of aviation forces are widely available but few understand how such forces are best used in prosecuting defence and security policy The Air Weapon seeks to address this deficiency by setting out the doctrines which guide the use of air power at the strategic and operational levels of war It identifies what aviation forces can and cannot be used to achieve It encompasses doctrines for war fighting and also for war prevention And it suggests possible directions for future doctrinal development Following a cohesive top down analytical path the study deals with air power in the only viable way as an integrated entity The Air Weapon is perhaps the only all encompassing high level study of this critically important yet all too little understood form of military power      **Soviet Military Operational Art** David M. Glantz,1991 David Glantz examines the Soviet study of war the re emergence of the operation level the evolution of the Soviet theory of operations in depth

before 1941 and its application in the European theatre and the Far East between 1941 and 1945      **The Evolution of the US Air Force** Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general      **Building the Tatmadaw** Maung Aung Myoe, 2009-01-22 Ever since Myanmar regained her independence in January 1948 the Tatmadaw Myanmar Armed Forces has been crucial in restoring and maintaining law and order It is one of the most important institutions in Myanmar politics Various aspects of the Tatmadaw have been studied The most notable area of study has been the political role of the military This study looks at the organizational development of the Myanmar armed forces It analyses four different aspects of the Tatmadaw military doctrine and strategy organization and force structure armament and force modernization and military training and officer education It sets out security perceptions and policies charting developments in each phase against the situation at the time and also notes the contributions of the leading actors in the process Since early 1990s the Tatmadaw has implemented a force modernization programme This work studies rationales and strategy behind the force modernization programme and examines the military capabilities of the Tatmadaw Drawing extensively from archival sources and existing literature this empirically grounded research argues that while the internal armed security threat to the state continues to play an important role it is the external security threat that gives more weight to the expansion and modernization of the Tatmadaw since 1988 It also argues that despite its imperfections the Tatmadaw has transformed from a force essentially for counter insurgency operations into a force capable of fighting in limited conventional warfare      **Soviet Military Operational Art** Colonel David M. Glantz, 2012-11-12 David Glantz examines the Soviet study of war the re emergence of the operation level and its connection with deep battle the evolution of the Soviet theory of operations in depth before 1941 and its refinement and application in the European theatre and the Far East between 1941 and 1945      **Strategy in the Modern Era** Pasquale De Marco, 2025-08-15 In a world defined by uncertainty and rapid change understanding strategy is not just an

academic pursuit it is a vital skill for navigating the complexities of the modern era Strategy in the Modern Era offers a comprehensive and engaging exploration of strategy delving into its historical foundations theoretical frameworks and practical applications in the 21st century This book takes readers on an intellectual journey through the evolving landscape of warfare examining the impact of technology the rise of non state actors and the challenges of globalization It delves into the intricacies of land sea and air power analyzing their respective strengths and limitations in shaping military strategy Beyond traditional military strategy the book explores innovative approaches to peace and security including the role of international organizations the complexities of nuclear proliferation and the growing salience of cyber warfare It investigates the developments in strategic thinking and practice since the end of the Cold War including the Revolution in Military Affairs Information Warfare and Space Warfare Furthermore the book grapples with the ethical dimensions of strategy engaging with concepts such as the just war tradition and the moral implications of emerging technologies It explores the intricate relationship between strategy and grand strategy highlighting the challenges of developing a coherent and effective framework for addressing complex global issues Written in an accessible and engaging style Strategy in the Modern Era is an essential resource for students of international relations military professionals policymakers and anyone seeking to understand the intricacies of strategy in the modern world Its comprehensive analysis and thought provoking insights make it an invaluable guide for navigating the complexities of the 21st century If you like this book write a review
