Managing Health Care Business Strategy George B. Moseley III, 2017-03-20 Managing Health Care Business Strategy is the definitive textbook on strategic planning and management for healthcare organizations. It offers all the basic information on strategic planning and management within the unique context of organizations concerned with the delivery and financing of health care. It does this by noting the singular strategic environment in health care, explaining the special procedures and options available to health care organizations, and providing real life examples in the form of case studies. It includes not only a description of the basic multi step process of creating and then managing a strategic plan, but also a detailed look at the role played by the key business functions: finance, marketing, human resources, information technology, and law, as well as specific strategic options: merger, acquisition, reorganization, joint venture, and some of the popular tools for analyzing strategic situations: balanced scorecard, Six Sigma, SWOT.

Strategic Management Arthur A. Thompson, Alonzo J. Strickland, 1999 Thompson Strickland is the strategic management market leader by a wide margin. The eleventh or alternate edition of the book contains exactly the same text as the 10th edition but includes all new cases. With so many business schools offering a strategic management course every term, the case collection in any one edition wears out after a few terms. The strong desire of adopters for fresh cases, together with welcome and much needed growth in the supply of first rate cases being developed each year, makes it necessary for us to institute a short case revision cycle and provide a second collection of cases to choose from. The 10th edition, with all its various components, will be available throughout the life cycle of the 11th edition.

Value-creation in Middle Market Private Equity John A. Lanier, 2016-02-17 Value creation in Middle Market Private Equity by John A Lanier holistically examines the ecosystem relationships between middle market private equity firms and their portfolio companies. Small business is the job creating engine in the US economy and consequently is a prime target market for private equity investment. Indeed, private equity backs over six of each 100 private sector jobs. Both the small businesses in which private equity firms invest and the private equity firms making the investments face inter and intra company fiduciary leadership challenges while implementing formulated strategy. The architecture of each private equity firm portfolio company relationship must be uniquely crafted to capitalize on the projected return on investment that is memorialized in the investment thesis. Given the leveraged capital structure of portfolio companies, the cost of a misstep is problematic. Individual private equity professionals are typically members of multiple investment teams for the firm. Not only may each investment team have its own unique leadership style, but its diverse members have to assimilate styles for each team in which they participate relative to a specific portfolio company. Acquisitions and their subsequent integrations add exponential complexity for both private equity investment and portfolio company leadership teams; indeed, cultural integration ranks among the most chronic acquisition obstacles. Accordingly, the stakeholders of private equity transactions do well to embrace leadership best practices in applying value creation toolbox best practices. The perspectives of both the private equity investment team and the portfolio company leadership team are within the scope of these chapters.
