Indeed it is essential for carrying out all economic activities Business finance refers to the practice of raising and preserving money to satisfy an enterprise's immediate and long term financial requirements and goals The fact that it takes business financing to carry out any commercial function at all demonstrates the centrality of business financing The money an entrepreneur invests in his or her firm is usually insufficient to cover all of the company's bills In this context the administration of a company's finances takes on even more significance As a result company owners and their staff constantly hunt for new revenue streams to exploit The goal of a company's financial planning should be to maximize shareholder value Realize that maximizing wealth is not the same as maximizing profits The maximization of wealth is an all encompassing goal that guarantees a company's success
