Cases on Strategic Social Media Utilization in the Nonprofit Sector

Asencio, Hugo, Sun, Rui,2015-02-28 Typically utilized by larger corporations social media marketing and strategy is lacking in small and medium sized nonprofit organizations Although these organizations are beginning to incorporate this form of

online communication there is still a need to understand the best practices and proper tools to enhance an organization's presence on the web. Cases on Strategic Social Media Utilization in the Nonprofit Sector brings together cases and chapters in order to examine both the practical and theoretical components of creating an online social community for nonprofit organizations. The technologies discussed in this publication provide organizations with the necessary cost-effective tools for fundraising, marketing, and civic engagement. This publication is an essential reference source for practitioners, academicians, researchers, and advanced level students interested in learning how to effectively use social media technologies in the nonprofit sector.

Crisis-Related Decision-Making and the Influence of Culture on the Behavior of Decision Makers Ásthildur Elva Bernhardsdóttir, 2015-08-31. This book provides an analysis on the impact of culture on crisis management, exploring how different cultural types are reflected in crisis-related decision-making patterns. Providing an interdisciplinary and international perspective with a rich research and practical outlook, this work is an important contribution to the field of crisis management and decision-making. Offering essential understanding to how countries, organizations, groups, and individuals prepare for and respond to crises, thus combining research across several disciplines, offering theoretical development, empirical testing, and reporting on the testing of a large number of hypotheses across several frameworks. The novelty of this book lies in its presentation of the quantitative testing of the relationship between cultural theory and crisis management, drawing on data from cases that cross continents and crises types. The book also includes a review of cases from South Korea and suggests a number of ways in which practitioners at various levels of government can prepare their organizations to cope better with the introduction of cultural bias into the decision-making process. Those with an interest in risk management, disaster management, and crisis management will value this pioneering work as it reveals the influence of cultural bias in decision-making processes. This work offers important insights for practice as well as for theory building. Scholars and practitioners of public administration, management, political and international relations, organizational social and cultural psychology, amongst others, will all gain from reading this work.
