management advanced operations management and strategic operations management will find this textbook fulfills all their requirements whilst advanced undergraduate classes in these areas will also find the book an essential read     Operations Management Lee J. Krajewski, Larry P. Ritzman, 1999 In this text the authors balance the presentation of both corporate strategy and analytical tools by presenting decision making within the context of a firm's competitive priorities A technology focus is new to this edition with Internet research exercises expanded PowerPoint slides for the teacher and support student software Real world examples demonstrate how manufacturing and service organizations meet operations challenges and Internet activities direct students to evaluate real world software This edition features a cross functional perspective that demonstrates how operations is linked to other functional areas such as IT marketing finance and HR     **Strategic Operations Management** Steve Brown, Richard Lamming, John Bessant, Peter Jones, 2000 Strategic Operations Management examines the latest thinking in this fast moving area Businesses constantly face ongoing and increased amounts of competition Coping with this competition demands that strategies must be already in place which can deal with key questions such as what business is the firm really in what does the firm do best and why where and how can it outsource some of its activities how can opportunities become quickly exploited and how can the firm's capabilities help to ward off external threats from new and existing players This text believes that successful operations management depends on having strategies in place which combine both manufacturing and service areas into an overall customer offering This means that strategic relations must be established with other players operations management is no longer a firm specific matter Strategic Operations Management combines four themes strategy services innovation and management of relationships both in the supply chain and with other players This is done by dividing chapters into a past present future scenario approach which illustrates how these strategies affect business Strong team of writers of international standing Content is thought provoking and challenging excellent in terms of stimulating debates New issues explored as well as old contrasting mass production versus mass customisation and innovation     *Operations Management* Terry Hill, 2000-01 Concluding with over 20 extended case studies from both the manufacturing and service sectors plus numerous end of chapter discussion questions this should be useful reading for students taking operations management courses     *Strategic Operations Management* David Walters, Mark Rainbird, 2017-09-16 The value chain framework has made its way to the forefront of management thought as a powerful analysis tool for strategic planning Its ultimate goal is to maximize value creation while minimizing costs In this book David Walters applies the framework to strategic decision making in the field of operations management     **Strategic Operations Management**, 2005 The only truly strategic text for Operations Management     **Strategic Operations Management** Firdoos Quraishi, 2014-11-15 Operations management is an area of management concerned with overseeing designing and controlling the process of production and redesigning business operations in the production of goods or services It involves the responsibility of ensuring that business operations are efficient in terms of

using as few resources as needed and effective in terms of meeting customer requirements It is concerned with managing the process that converts inputs in the forms of raw materials labor and energy into outputs in the form of goods and or services The relationship of operations management to senior management in commercial contexts can be compared to the relationship of line officers to highest level senior officers in military science The highest level officers shape the strategy and revise it over time while the line officers make tactical decisions in support of carrying out the strategy In business as in military affairs the boundaries between levels are not always distinct tactical information dynamically informs strategy and individual people often move between roles over time
