Strategic Planning Basics For Special Libraries:

Strategic Planning Basics for Special Libraries Doris Asantewa, 1992 **Strategic Planning Basics for Special Libraries** Doris Asantewa, *Fundamentals of Planning and Assessment for Libraries* Rachel A. Fleming-May, Regina Mays, 2021-07-23

The concepts of planning and assessment are intrinsically linked and understanding them is essential for raising the library's profile and strengthening its position among stakeholders and the community. Even if you're an LIS student or are new to the profession or if planning or assessment are not your primary areas of responsibility, you still have a role to play in the success of organizational efforts. Fleming-May has more than a decade of experience in planning and assessment initiatives and instruction, and Mays was her institution's first assessment librarian. Their primer draws from theory, research, and their first-hand observations to illuminate such topics as characteristics of bad planning strategy that can help to illustrate a better approach, reasons why using economic models like ROI fall short, how to mix the three types of planning guidelines to ensure that assessment is meaningful and actionable, tips for creating effective surveys emphasizing users' needs with a critical assessment framework, data analysis for surveys, interviews, focus groups, and observation, four questions to ask about audience level before you develop a report, a sample 3-year assessment plan that can be customized, and seven steps for developing a culture of ongoing assessment.

The New Professional's Handbook Sheila Corrall, Antony Brewerton, 1999

Newly qualified library and information staff are thrown in at the deep end in their first jobs where they are expected to function as skilled practitioners. They find themselves in a world where technological developments and global competition are changing the shape and reach of information services. The scale and speed of change present constant challenges to develop awareness and understanding of the wider environment in order to improve local services. Their need for support in their professional development is particularly acute at this stage in their careers. This easy-to-use manual aims to provide that support at both operational and strategic levels. It is designed to help new professionals make sense of the contemporary information world and devise effective strategies for developing their skills and services. It brings together a host of useful sources covering the professional and managerial aspects of information work, introducing key concepts and techniques in a coherent framework and using practical examples to illustrate current organizational and service trends. The book offers a global cross-sectoral perspective on information resources and services, covering strategy and marketing as well as day-to-day operations. The thematic arrangement means that each chapter can be used as a self-directed training module or as the basis of a session with a supervisor or mentor. Packed with activities and reflection points, the book encourages a critical approach through the use of questions and also offers annotated bibliographies providing quick access to relevant publications, websites, and organizations worldwide. Readership: Particularly valuable as an on-the-job reference source for those working towards chartered corporate membership of professional bodies, this workbook also makes extremely useful reading for students and lecturers, staff development officers, those returning to
