

MANAGEMENT STRATEGIES FOR MULTIPLE HANDICAP

Introduction

Children who have a combination of severe disabilities are called “*Multiply Disabled*”. Caring for multiply and severely disabled children is never easy and they need an enormous amount of time & patience.

The combination of disabilities and degree of severity is different in each child. The time at which the disability occurs in the child, what is known as the ‘age of onset’, may also range from birth to a few days after birth, from early childhood till late teens. Sometimes children are born with one disability but acquire the second or third disabling conditions during childhood. The characteristics and the needs of the children depend on the nature of combination of the disabilities, the age of onset and the opportunities that have been available to a child in his environment.

Multiple Disabilities refer to: a combination of two or more disabling conditions that have a combined effect on the child’s communication, mobility and performance of day-to-day tasks.

Theology and Down Syndrome Amos Yong, 2007. While the struggle for disability rights has transformed secular ethics and public policy, traditional Christian teaching has been slow to account for disability in its theological imagination. Amos Yong crafts both a theology of disability and a theology informed by disability. The result is a Christian theology that not only connects with our present social, medical, and scientific understanding of disability but also one that empowers a set of best practices appropriate to our late modern context.
